IDENTIFIERS	*Texas

ABSTRACT

An overview of Texas public schools for the 1991-92 school year is provided. This annual statistical report is offered as a step toward greater accountability at the state and district levels. "Snapshot '92" begins with an examination of state level data, and concludes with detailed information about each district. The state level, or Statistical Highlights, section discusses the major areas of administrative units, students, student performance, staff, and finances, and covers both the current year and historical trends. The Detailed Statistics section provides extensive school district information in the same major areas for the more than 1,000 Texas districts. The Detailed Statistics section first summarizes 92 data items for groups of districts categorized by size, rural and urban area, property wealth per pupil, tax effort, and Education Service Center. The distribution of these items is then presented in tables showing the value of each item at various percentiles of school districts. Values for all data items are then listed for each school district, followed by a state summary. Definitions of the 92 items follow, and "Snapshot '92" concludes with three appendixes that contain data sources, end notes, and a district listing. Twenty-six exhibits in the text, and six in the appendixes present information in graphic form. The Detailed Statistics section contains 234 pages of tabular information. (SLD)

This fifth edition of ***Snapshot*** expands the publication's emphasis on the achievement of Texas students. As standards are raised, incremental progress is being made; however, serious performance gaps among disadvantaged and ethnic minority students continue to challenge educators at all levels.

The information found in ***Snapshot '92*** covers students and their performance as well as the staffing and financing of public schools. This document provides a critical baseline by which all interested parties can measure the progress of Texas toward excellence and equity in student achievement.

I invite you to take the time to read ***Snapshot '92*** and become informed about public education in Texas. With this knowledge, anyone concerned about student achievement will be better able to understand and evaluate the debate and the decisions being made regarding our most important task, educating our children.

Sincerely,

Lionel R. Meno
Commissioner of Education

ACKNOWLEDGMENTS

The preparation of this document would not have been possible without the assistance of many people. First, appreciation goes to the many local school districts and regional Education Service Center officials who report the vast majority of the information that is used. The quality of the data they submit directly affects the quality and usefulness of the document.

Next, many Texas Education Agency staff deserve credit for so freely contributing their time although they were not part of the project staff. These include Ricky Arredondo, Linda Hargrove, Richard Dirkes-Jacks, Shannon Housson, and Rob Scott; photographer Jack Brown for the cover photographs; and data processing staff in Technology Applications.

Thanks also go to the students and staff of Kealing Jr. High School of Austin for allowing us to use their photographs on the cover.

Introduction

Snapshot '92: 1991-92 School District Profiles, presents an overview of Texas public schools for the 1991-92 school year. The Texas Education Agency (TEA) considers the publication of this annual statistical report to be a step toward greater accountability at both the state and school district levels, as it makes available a wide variety of data in a consistent format from year to year. Changes in presentation this year reflect the growing emphasis on state performance measures and changes in financing public schools.

Document Organization

Snapshot '92 begins with an examination of state level data and concludes with detailed information about each school district.

The state level, or *Statistical Highlights* section, discusses the major areas of administrative units, students, student performance, staff, and finances, and covers both the current year and historical trends. Graphic illustrations are included in this section.

The *Detailed Statistics* section provides extensive school district level information on the same major areas discussed in the *Highlights* section. The *Detailed Statistics* section contains three parts.

First, 92 data items are summarized for groups of school districts categorized by size, by a rural versus urban classification, by property wealth per pupil, by tax effort, and by Education Service Center region.

Second, the distribution of these items is presented in tables showing the value of each data item at various percentiles of school districts. The highest, lowest, and median values for each data item are shown in addition to values at the 5th, 10th, 25th, 75th, 90th, and 95th percentiles. This section is labelled *Distribution Statistics*.

Third, values for all data items are listed for each school district, followed by a state summary. This section, titled *District Detail*, is in county name order with districts arranged alphabetically within each county.

Definitions of the 92 data items follow the *District Detail* section. The definitions are arranged in numerical sequence by the number of the item.

Snapshot '92 concludes with three appendices. The first, *Data Sources*, lists the sources of data in alphabetical order by the abbreviated labels used throughout the document. Each major source of data is described and accompanied by a listing of associated data items.

End Notes, the second appendix, is intended to clarify terms that are not thoroughly addressed in other parts of the document.

The third appendix, *District Listing*, lists school districts in alphabetical order by name, with Education Service Center (ESC) and State Board of Education (SBOE) assignments as well as each district's county district number. This list will help readers locate a particular district in the *District Detail* section by relating the district name to the appropriate county.

Overview of Data Sources

The vast majority of data in this document is reported to the TEA by school districts. The 1991 fall data collection of the Public Education Information Management System (PEIMS) is the primary source of data. Information obtained from the Property Tax Division of the Comptroller of Public Accounts (CPTD) for the 1991 calendar year is also used. Student test scores are reported to the TEA by the testing companies.

Most of the items presented in this edition also appeared in the 1990-91 edition. A few items have been added because they have been adopted by the SBOE as indicators in the Academic Excellence Indicator System (AEIS). To allow room for these new indicators, a few others have been modified or dropped. See *Exhibit C* in the *End Notes* section for a crosswalk of prior year data items to this year's data items. The 92 items span six pages, therefore a new set of districts is presented every sixth page. While there is some analysis of state and group level data in the *Highlights* section, the *District Detail* information is descriptive only. Readers should use discretion in drawing conclusions from the data presented.

Statistical Highlights

AGENCIES OF PUBLIC EDUCATION

Central Education Agency

The Central Education Agency, composed of the commissioner of education, the SBOE and the TEA, guides and monitors public education in this state.

The SBOE provides leadership and state level administration for Texas public education. The commissioner of education and the TEA staff work closely with the board to implement education policy.

The SBOE is comprised of 15 elected members representing various regions of the state, one of whom is appointed chair for a two-year term by the governor. A map of the 1991-92 SBOE district boundaries is included in the *End Notes* section.

In 1992 all state board positions were subject to re-election because SBOE district boundaries were redrawn, along with the legislative and congressional district boundaries, based on the decennial census. As of January 1, 1993, the board will be comprised of 11 returning members and 4 newly elected members.

The TEA, located in Austin, Texas, is the administrative unit of the Central Education Agency. Under the management of the commissioner of education, the TEA provides curriculum and technical assistance, accredits school districts, operates research and information programs, monitors for compliance with federal and state guidelines, and serves as a fiscal agent for the distribution of state and federal funds. In 1991-92 approximately 1,070 full-time equivalent staff were employed at the TEA.

Local School Districts

While the SBOE provides leadership for education, much of the control of public schools remains with the over 1,000 local school districts. Districts serve students at one or more campuses in grades pre-kindergarten through twelve. There are over 6,000 public school campuses in Texas, and over half of these serve students in the elementary grades.

EXHIBIT 1
Enrollment by Campus Type

Campus Type	Enrollment	# of Campuses	% of Total
High School	863,618	1,103	18.1%
Junior High School	194,481	299	4.9%
Middle School	528,873	824	13.5%
Elementary School	1,812,368	3,428	56.2%
Elementary & Secondary Combined	61,038	443	7.3%
TOTAL	3,460,378	6,097	100.0%

Elementary schools make up 56 percent of all campuses in Texas and serve 52 percent of all students. Typically, junior highs serve seventh and eighth grade students while middle schools serve sixth through eighth graders.

EXHIBIT 2
Number of Districts by Type

District Type	Number of Districts
Regular FSP	1,044
Special Statutory	6
State-Administered	11
TOTAL	1,061

The majority of school districts in Texas have locally elected governance boards and are able to tax property within their boundaries.

Exhibit 1 presents counts and enrollments for all campus types. Campuses are typed according to the range of grades they offer. *End Notes* provides more information about the grades offered in each of these categories.

Districts in Texas are classified according to governance structure and the ability to raise local revenue. Counts of districts by type are illustrated in *Exhibit 2* and are defined as follows:

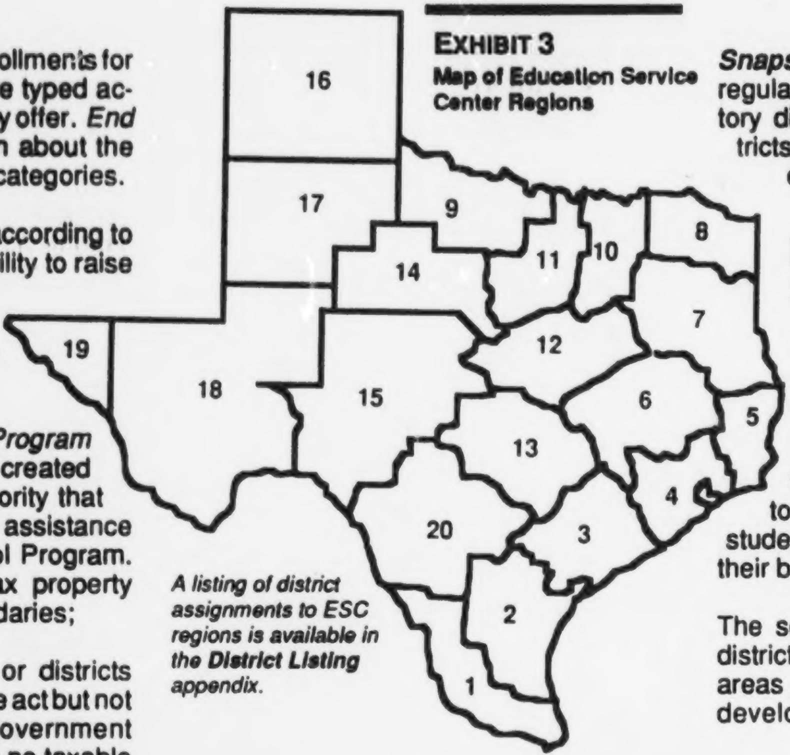
1) *Regular Foundation School Program (FSP) Districts*, or districts created under general statutory authority that are eligible for state funding assistance under the Foundation School Program. These districts may also tax property within their geographic boundaries;

2) *Special Statutory Districts*, or districts created by a special legislative act but not administered by a state government agency. These districts have no taxable property. They include the public schools associated with military bases in the San Antonio area and the Masonic Home in Fort Worth, and;

3) *State-Administered Districts*, or districts created by legislative act which are both funded and administered by a state government agency. Most are administered by the Texas Department of Mental Health and Mental Retardation or the Texas Youth Council.

EXHIBIT 3

Map of Education Service Center Regions



*A listing of district assignments to ESC regions is available in the **District Listing** appendix.*

Snapshot '92 includes data for the 1,044 regular FSP districts and the 6 special statutory districts only. State-administered districts do not have the same reporting requirements and are not included.

Regional Education Service Centers

The 20 regional ESCs serve the school districts within defined geographic boundaries. Great disparity exists among the ESCs in terms of the number and characteristics of the districts they serve. However, all are expected to provide services that support improved student achievement in the districts within their boundaries.

The service centers work closely with the districts to provide technical assistance in the areas of accreditation and curriculum, staff development and administrator training,

EXHIBIT 4

BEST COPY AVAILABLE

and the implementation of PEIMS. Service centers also provide schools with instructional media, data processing services and assistance in program improvement in areas such as bilingual education, special education, gifted and talented education, and programs for at-risk students.

In 1991 Commissioner Lionel R. (Skip) Meno transferred funding of agency administrative positions to provide 60 field service agents, 20 Partnership Schools facilitators, and 20 regional certification officers to the ESCs. The field service agents work closely with school districts to help solve problems related to student achievement. The 20 Partnership Schools facilitators work with the 83 Partnership Schools to facilitate school improvement at those schools. The regional certification officers provide technical assistance to any school within the region on teacher certification matters. The commissioner of education approves services and budgets of ESCs, as well as performance contracts.

Exhibits 3 and *4* provide information about the locations and sizes of ESCs. Statistics for all 92 items are summarized to the regional level in the *Detailed Statistics* section. Additional information about the service centers is available in the *Biennial Report on Education Service Centers* published by the agency.

STUDENTS

Student Measures

Districts count students several ways. The two types of student counts referenced in this document are enrollment and average daily attendance (ADA).

Enrollment is the number of students enrolled in grades pre-kindergarten through 12 as of October 25, 1991. Unless otherwise noted, student counts and per pupil amounts presented in this document use enrollment

EXHIBIT 5
District Size, Number of Districts, and Enrollment

District Enrollment at Selected Percentiles

Percentile	Enrollment	
100% (Largest)	196,512	Houston ISD
95%	15,198	
90%	5,833	
75%	2,204	
50% (Median)	799	
25%	323	
10%	142	
5%	95	
0% (Smallest)	2	Allamoore ISD

figures. *Average Daily Attendance* is a number calculated by the TEA from attendance information reported by districts for the three six-week periods in the fall and the three six-week periods in the spring. ADA is the primary student measure used to allocate state funds. This definition of ADA is not the equivalent to prior years due to statutory changes effective September 1, 1991.

District Characteristics

The 1,050 regular and special statutory public school districts in Texas range in size from 2 students in the smallest district to over 196,000 in the largest. The 8 largest districts in the state serve 20 percent of all public school students, while the smallest 382 districts, representing 36 percent of all districts, enroll less than 3 percent. This inverse relationship between the number of districts and the number of students enrolled has always been a defining characteristic of the Texas public school system. *See Exhibits 5 and 6.*

The ethnic distribution of students varies greatly across the state and appears to depend in part on the size and community type of the district. Districts in major urban areas serve an 80 percent minority student population while districts in rural areas serve a population that is 72 percent white. Statewide, growth in the minority student population continues to exceed non-minority growth. Minority students now comprise 51.0 percent of the population, compared with 50.5 percent in 1990-91 and 49.7 percent in 1989-90.

Student participation in special programs such as bilingual or vocational education differs by community type, district size, and geographic location. A greater percentage of students in rural districts are enrolled in vocational courses — almost 19 percent compared with 12 percent in major urban districts. By far, the highest percentages of students in bilingual or English as a Second Language (ESL) programs have been identified in the Edinburg and El Paso service center regions with 35 percent and 20 percent limited English speaking students, respectively. These figures are well above the state average of 8.9 percent.

Students identified as economically disadvantaged, defined as those students eligible for the national free or reduced-price lunch program or eligible for other public assistance, appear in greater percentages in large, urban districts and to some extent in very small districts. The lowest percentages of economically disadvantaged students can be found in districts suburban to the major urban districts. As one would expect, the property wealth of the district is strongly correlated with the economic status of the students.

The differences that exist across the state in terms of district size, the ethnic composition of student populations, and the needs of special population students illustrate the great diversity that can be found among Texas public schools.

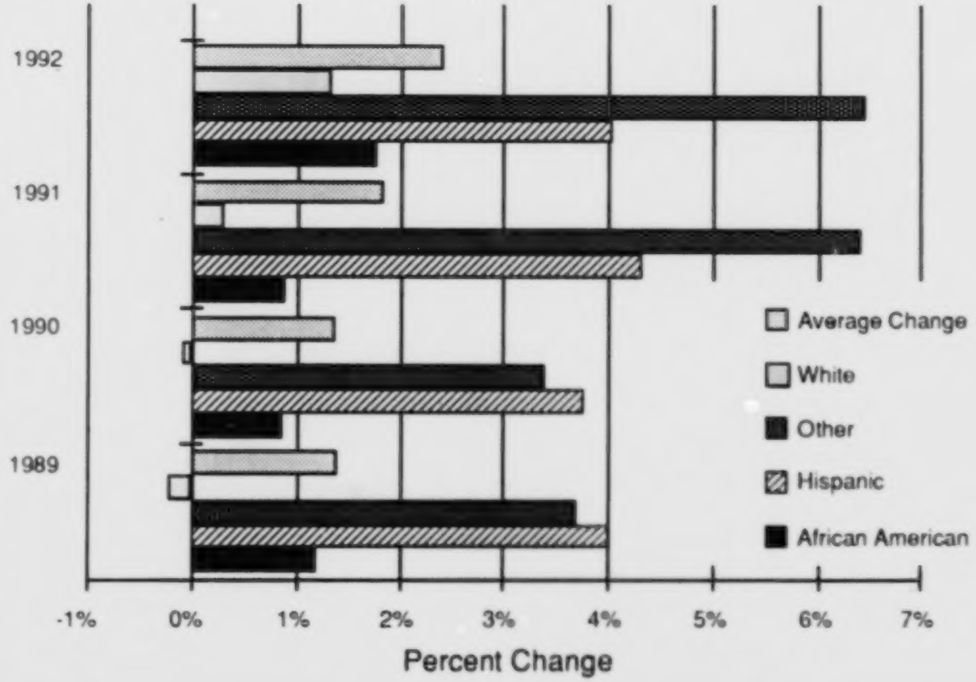
Student Population Growth

During 1991-92, the 1,050 regular and special statutory districts in Texas served over 3.4 million students in pre-kindergarten through grade 12. This number of students represents a 2.4 percent increase from the prior year, an appreciably greater rate of growth than the 1.9 percent increase experienced from 1990 to 1991.

Sixty-eight percent of the districts in the state reported enrollment increases in 1991-92 compared to only 57 percent with increases in 1990-91. Districts in suburban areas around major urban and other central cities experienced higher rates of increase, 3.5 percent for both, while major urban and rural districts averaged smaller, 1.3 percent, increases.

In 1991-92, growth in the minority student population averaged 3.5 percent, with the greatest increase, 6.5 percent, occurring in the Asian/Pacific Islander and native American populations. These populations, categorized as "other," now account for 2.3 percent

EXHIBIT 7
Year-to-Year Percent Change in Enrollment by Ethnicity
1989 to 1992



The average change in enrollment from 1991 to 1992 was 2.4 percent. Although the category of "other," containing Asian/Pacific Islanders and native American students, continues to exhibit the greatest percentage increase, it is the Hispanic population that is driving statewide growth. Of the 82,060 student increase in Texas' total enrollment from 1991 to 1992, 56.2 percent were Hispanic.

of all students. The number of African American students grew by 1.8 percent, representing a net increase of almost 8,600 students. This growth rate is significantly higher than the 0.9 percent experienced by this population in both 1991 and 1990. African Americans now comprise 14.3 percent of the total public school population.

Although the Hispanic rate of growth, 4 percent, is not the highest among the ethnic groups, it is the Hispanic population that continues to drive statewide growth. Of the 82,060 student increase in Texas' total enrollment, 56.2 percent or 46,122 were Hispanic. Hispanic students now account for 34.4 percent of the total number of students.

In contrast, the white population grew by only 1.35 percent, or by 22,562 students. Although this rate of increase is the smallest among the ethnic groups, it represents significantly greater growth for this population compared with prior years. *See Exhibit 7.* The overall percent of white students in the total student population dropped from 49.5 percent in 1990-91 to 49.0 percent this year.

Growth by Grade Span

High growth experienced by elementary schools in past years is now reaching the state's middle schools— enrollment in grades 6-8 increased by 30,000 students, a gain of 3.9 percent over 1990-91. The greatest increase occurred in grade 6, 5.3 percent. Early childhood enrollments continue to be high; early education, pre-kindergarten, and kindergarten grew by 2.98 percent. However, this 10,000 student increase is not as high as the 14,000 student increase experienced in the prior year. Growth in these six grades was the primary driver of the overall 2.4 percent increase in total enrollment.

Elementary growth in grades 1-5 is the lowest of all grade spans, at 1.7 percent. Not surprisingly, grade 1 enrollment has one of the highest percentages of new public school students, 18.3 percent, as children enrolled in private pre-school programs the prior year enter the public schools.

High school enrollments were up by 2.1 percent, a marked difference over prior years. Beginning with the 1988-89 school year, high school enrollment had declined slightly from year to year. This increase is due in part to larger student populations over 1990-91, but also may reflect successes in dropout prevention programs and in-migration from private schools and other states.

Statewide, over 82 percent of the 1991-92 enrollment was comprised of returning students. Of those students, 3.8 percent were reported as enrolled in the same grade as in the prior year. Grades with the highest percentages of retained students are grade 9 with almost 11 percent and grade 1 with 8.8 percent. The remaining 17.9 percent of enrolled students appear to be new public school students.

Each ethnic group evidenced approximately the same patterns of growth within grades as appear in the statewide patterns. Within each grade, Hispanic students, native Americans, and Asians/Pacific Islanders have rates of growth that generally exceed the state average. African American growth exceeds the state average only in grades 7, 8 and 9, increasing at 1.2 to 1.4 times the statewide growth in these grades.

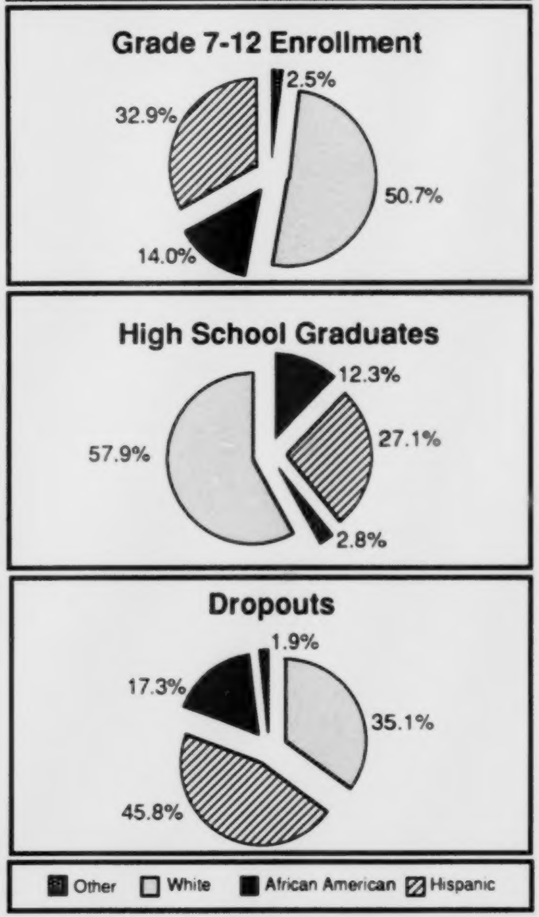
The pre-kindergarten and kindergarten grades have higher percentages of minority students (58.5 percent) than the state on average (51 percent). Statutory requirements for pre-kindergarten education stipulate that Limited English Proficient (LEP) and/or economically disadvantaged pupils are to be identified and served, characteristics which are highly correlated with ethnicity in Texas. In grades 1-6, the ethnic distribution is virtually the same as the state, while the secondary grades (grades 7-12) have slightly more white students, 50.7 percent compared with 49 percent statewide.

Graduates

During the 1990-91 school year 160,527 12th grade students graduated from Texas public schools. This count of graduates differs from the definition used in ***Snapshot '91*** in that it is an actual rather than an anticipated count. Of the total graduates, almost 9,400 were identified as special education students. The graduation rates presented in the *District Detail* section and in exhibits are computed using non-special education students only.

Statewide, white students accounted for 57.9 percent of all graduates, Hispanic students, 27.1 percent, African American students, 12.3 percent, and other students, 2.8 percent. *See Exhibit 8.*

EXHIBIT 8
Student Populations by Ethnicity



Although African American and Hispanic students represent less than half of the population in grades 7-12, they account for nearly two-thirds of all dropouts, but only a third of high school graduates.

The total number of graduates (including special education graduates) is 64.9 percent of all 7th graders enrolled in 1985-86. This loss of almost 87,000 students between the 7th and 12th grades indicates a major problem with students dropping out before earning a diploma. In the future, the TEA will examine various data sources to estimate the number of dropouts who later return to school or complete a GED.

Dropouts

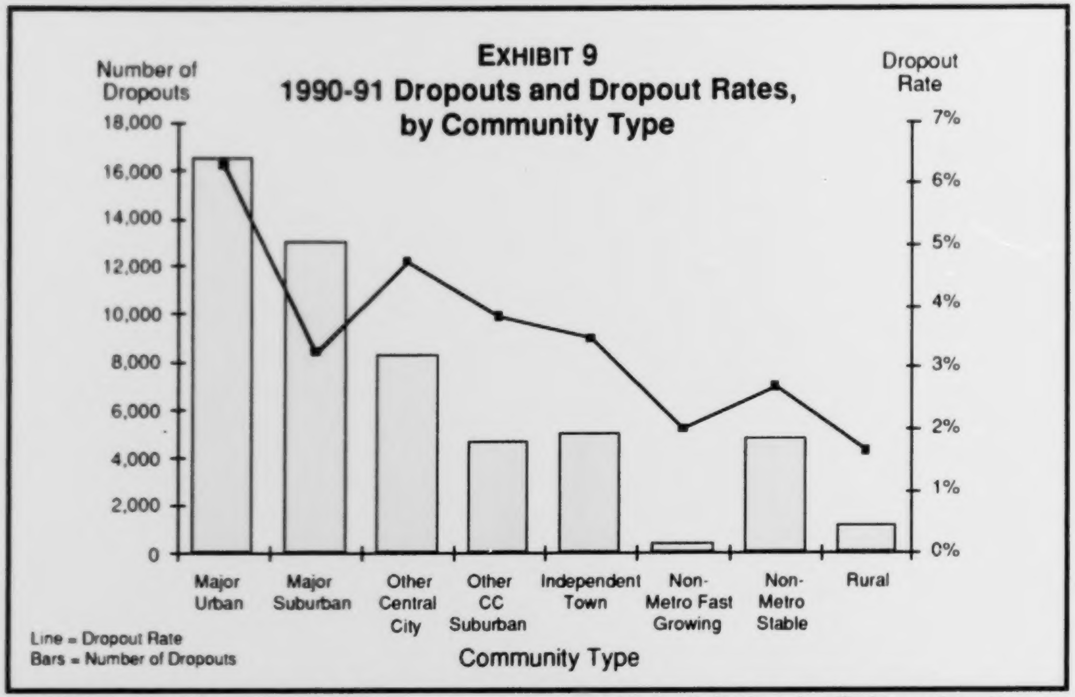
School districts reported a total of 53,965 dropouts in grades 7 through 12 for the 1990-91 school year, representing an annual statewide dropout rate of 3.9 percent or an estimated longitudinal rate of 21.4 percent. This represents a 23 percent decrease from the number of dropouts reported last year (1989-90). In general, considerable reductions in the number of dropouts reported have occurred each year since uniform dropout data have been collected through PEIMS.

Urban districts and districts with high percentages of minority students have the highest dropout rates. *Exhibit 9* depicts the relationship between community type and dropout rates.

More males (55 percent) than females dropped out, although there is some variation in the distribution by gender within grade level. Within grades, the highest percentage of male dropouts occurs in the ninth grade with 57 percent. For females the highest percentage occurs in grade 8, where they account for 50 percent of the dropouts.

Among all dropouts, almost 67 percent dropped out during the regular school year as opposed to over the summer. Almost one-third of all reported dropouts were in the ninth grade. It appears that the first year of high school can be overwhelming to the student who is marginally prepared academically. Eighty-seven percent of the ninth graders who dropped out were over-age for grade. It is estimated based on the students' birth dates that over 77 percent of all dropouts were at least one grade level behind in school indicating they were retained one or more times over their school careers. *See Exhibit 10.*

Among the Asian/Pacific Islander and native American population of 7th through 12th graders, 3.1 percent dropped out. For white students that figure was 2.7 percent; for African Americans, 4.8 percent; and for Hispanics, 5.6 percent. Refer to *Exhibit 8* for a breakdown of the ethnicities of the total 7th through 12th grade student population compared with graduates and dropouts.



In 1989-90, nearly 36 percent of all dropouts were concentrated in the 8 districts classified as major urban. In 1990-91, that figure dropped to 31 percent.

EXHIBIT 10

1990-91 Dropouts by Grade Level for Selected Student Characteristics

Grade Level	Total Dropouts	Male	Female	Special Education	Economically Disadvantaged	Not on Grade
7th	2,260	1,153	1,107	225	940	1,356
8th	4,106	2,051	2,055	429	1,658	2,717
9th	17,067	9,709	7,358	1,717	5,274	14,917
10th	12,219	6,684	5,535	1,310	3,117	10,330
11th	10,029	5,493	4,536	953	2,166	7,557
12th	8,284	4,395	3,889	597	1,600	4,818
TOTAL	53,965	29,485	24,480	5,231	14,755	41,695

Beginning with the 1990-91 school year, the implementation of the Personal Identification (PID) system for all students enrolled allowed the "recovery" of 4,452 of the reported dropouts. Recovered dropouts represent students reported as dropouts, but found to be enrolled in another district or reported as a dropout by another district. The count of 53,965 dropouts shown in this exhibit excludes these recovered students.

STUDENT PERFORMANCE

Increasing emphasis is being placed on the analysis and evaluation of the performance of Texas public school students. At a time of constrained financial resources and heightened expectations for our children's achievements, policymakers and citizens alike want to regularly examine the results of the educational system. One outcome of this interest was the development of the Academic Excellence Indicator System (AEIS).

The AEIS was mandated in 1989 to emphasize student achievement for purposes of accountability, as well as recognition. Standard reports containing indicators of student performance and information on school and district staff, finances, programs, and student demographics are produced annually for each school campus and district in Texas. These reports allow comparisons of performance as well as resources, provide a basis for setting campus performance objectives for the following year, and inform the public on the performance of their schools.

Much of the information provided in this section of ***Snapshot*** can also be found in the AEIS reports published in May 1992. Other items discussed in the *Students* section, such as graduation and dropout rates, are also indicators of student performance. See *Exhibit A* in the *End Notes* for a complete listing of the 1991-92 AEIS indicators.

Texas Assessment of Academic Skills

The Texas Assessment of Academic Skills (TAAS) testing program was administered for the second year in October 1991 to almost 1.2 million students in grades 3, 5, 7, 9, and 11. This testing program, as its name implies, emphasizes the assessment of academic skills rather than minimum skills. Earlier testing programs in Texas, the Texas Assessment of Basic Skills (TABS) implemented in 1980 and the Texas Educational Assessment of Minimum Skills (TEAMS) begun in 1985, measured minimum basic competencies. TAAS expanded the scope of content eligible for testing to include more of the instructional targets delineated in the essential elements (those areas of study identified by the State Board of Education as comprising a well-balanced curriculum). The TAAS program focuses on the student's higher order thinking and problem-solving skills.

TAAS measures student achievement in the areas of reading, writing, and mathematics.

BEST COPY AVAILABLE

EXHIBIT 11
Percent of Students Passing TAAS by Grade and Subject

Grade	# Students Tested	% Passing All Tests Taken	% Passing Math	% Passing Reading	% Passing Writing
3rd - Spanish	13,961	33.0%	72.0%	55.7%	42.0%
3rd - English	230,421	57.0%	85.3%	80.6%	62.6%
5th	235,883	47.4%	57.7%	62.5%	77.2%
7th	230,479	36.3%	50.9%	50.1%	59.6%
9th	241,371	35.9%	43.8%	59.5%	62.4%
11th	181,756	48.6%	56.6%	72.0%	78.2%
TOTAL	1,133,871	44.6%	59.0%	64.4%	67.2%

Like its predecessors, TAAS is a criterion-referenced test that relates test items to specific learning objectives. The objectives in TAAS are drawn from the essential elements established by the State Board of Education. Passing rates shown were calculated using the passing standard of 70 for all grades. Test results for special education students have been excluded from these calculations. The percent passing all tests taken for all grades (44.6%) differs slightly from the percent printed in the ***District Detail*** *due to the inclusion of third grade Spanish results in this exhibit.*

In the future, TAAS will measure a broader range of the curriculum, while reducing the number of grades at which the test is administered. By the 1994-95 school year, students in grades 4, 8 and 10 (exit level) will be tested in reading, writing, mathematics, science, and social studies. At grade 8, computer literacy (computer-based technology) will be included, while at grades 4 and 8 students' physical fitness/health (wellness) will be assessed. High school students will be tested upon completion of Algebra I, Biology I, and Computer Science. Oral proficiency in a second language will be assessed at grades 4, 8, or high school, whichever is appropriate for the student and local instructional program.

Various measurements can be used to interpret test results, but the measurement reported in this document is the percent of students passing all tests taken. The percent passing is variously shown as:

- the percent passing each subject for each grade;
- the percent passing all tests taken for a specific grade;
- the percent passing all tests taken for a specific sub-group; or
- the district passing rate for all subjects and all grades.

In 1991-92, the TAAS passing standard for all grades required students to answer the equivalent of 70 percent of the items correctly. This standard replaced the interim standard applied in 1990-91, which required students to answer only 65 percent of the test questions correctly at grades 3 and 5, and 60 percent correctly in grades 7, 9 and 11.

Rescoring the October 1990 test results using the higher passing standard allows comparisons to the results of the October 1991 test administration. The percents do not change dramatically from the first year to the second. For non-special education students, the percents of students passing all tests taken in October 1991 reflect slight declines in grades 3 and 11, and slight increases in grades 5, 7 and 9. Test results published in ***Snapshot '91*** are original test results from the October 1990 test administration using the lower standards that were in effect that year.

Exhibit 11 shows the results by grade and subject for October 1991 for non-special education students. Among the grades tested, the percent passing all tests taken is lowest in grades 7 and 9 with passing rates of 36 percent in both those grades. The highest rate for all tests taken is in grade 3 with 57 percent passing. Statewide, approximately 45 percent of the students tested passed all the tests they took.

The subject area with the highest passing rate varies by grade. For example, in all grades but grade 3, more students passed writing than mathematics or reading. In grade 3, for both the Spanish and English versions of the test, higher percentages of students passed mathematics.

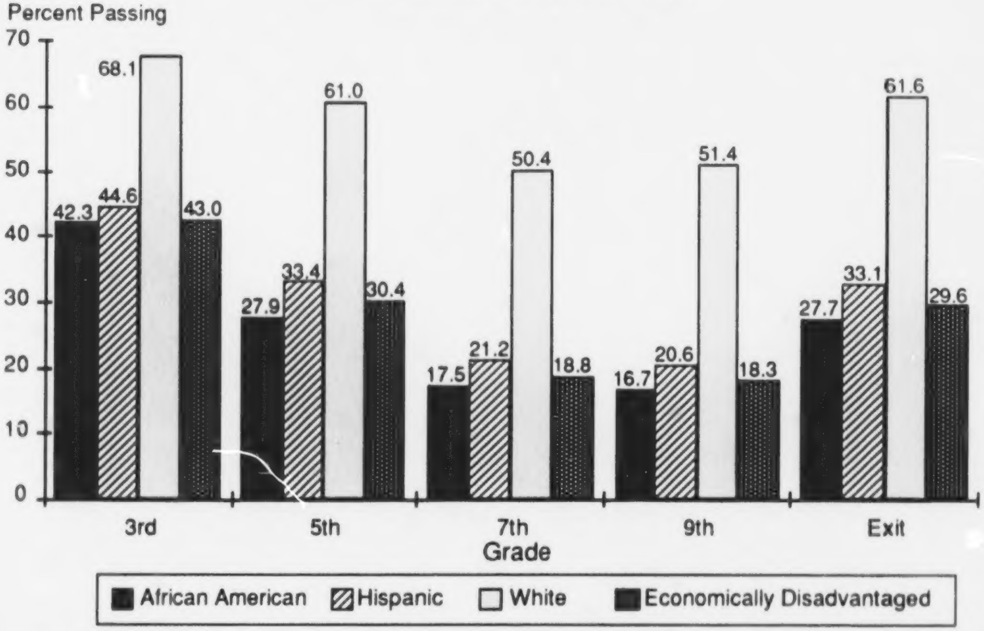
Significant disparities in performance exist among the major ethnic groups in Texas. In grade 11, 28 percent of African American students and 33 percent of Hispanic students passed all tests taken compared with 62 percent of white students. Similar patterns exist in the other grades tested, although the gaps are smaller in grade 3 where scores are higher overall. *See Exhibit 12.* Economically disadvantaged students had passing rates 14 to 19 percentage points lower than statewide rates, and over 20 percentage points lower than passing rates of non-economically disadvantaged students. Progress toward reducing these disparities is one objective the State Board of Education outlined in its *Long-Range Plan for Public Education.*

Districts must offer remediation to students failing to attain mastery in a subject area. In grades 3 through 11, 679,000 students, or approximately 57 percent of all students tested, will require some remediation. This figure is higher than the approximately 535,000 students in 1990-91 (46 percent) who required remediation due to failing the first year of the TAAS tests at the interim passing standard. The state compensatory allotment supports this remediation; however, it is allocated on counts of economically disadvantaged students, not the number of students requiring services.

Students failing to pass the grade 11 test (exit), or exit test, are not eligible to receive a Texas high school diploma. Among juniors taking the October 1991 TAAS exit test, over 98,000 or 52 percent, failed one or more of the subject areas. These students have four more opportunities to master the exit level TAAS test before the end of their senior year. At the end of three test opportunities, 51,200

EXHIBIT 12

Percent of Students Passing TAAS by Grade for Ethnicity and Economic Disadvantage



Disparities in performance among the major ethnic groups and the economic status of Texas school children are evident in this exhibit. Progress toward reducing these disparities, often referred to as the "equity gap," is one objective of the State Board of Education. Gaps are smallest in grade three where passing rates are higher overall.

students or 27 percent still had not met the TAAS requirement. Texas has no certificates of completion for students who fail to pass the exit-level TAAS.

Group information in the *Detailed Statistics* section shows that TAAS scores tend to be higher in major suburban districts and lower in large, urban districts. The two-volume TEA publication ***Texas Assessment of Academic Skills: Student Performance Results, 1991-1992***, is available for more information.

College Admissions Tests

Of Texas public high school seniors graduating at the end of the 1990-91 school year, over 72,000 (47.8 percent) took the Scholastic Aptitude Test (SAT) of the College Board's Admissions Testing Program and almost 48,000 (31.6 percent) took the ACT component of the American College Testing Program. In all, 94,207 Texas public high school seniors (62.3 percent) took one or both of these college admissions tests before graduation. Nationwide, approximately 42 percent of all graduates (public and nonpublic) took the SAT and 32.4 percent took the ACT.

EXHIBIT 13
SAT and ACT Scores
1990-91 Seniors for Texas and the Nation

	Texas Public School Graduates	All Texas Graduates	All U.S Graduates
SAT			
Verbal	410	411	422
Mathematics	463	463	474
Total	873	874	896
ACT			
English	19.6	19.7	20.3
Mathematics	19.4	19.5	20.0
Reading	20.2	20.2	21.2
Science Reasoning	19.8	19.8	20.7
Composite	19.9	19.9	20.6

Approximately 48 percent of Texas public high school seniors took the SAT, compared with 42 percent of seniors nationwide. Texas' public school SAT scores were 23 points lower than the nation in 1990-91, compared with 28 points lower in 1989-90. ACT scores remained below the national average as well.

The SAT consists of verbal and mathematics components, whereas the ACT includes tests of reading and science reasoning in addition to English and mathematics. Scores on the verbal and mathematics sections of the SAT range from 200 to 800 and sum to the SAT total score, which ranges from 400 to 1600. Each subject area component of the ACT has a score ranging from 1 to 36; the composite is the average of these four scores. Since October 1989, a revised ACT, the Enhanced ACT Assessment, has been administered.

As shown in *Exhibit 13*, Texas average scores on both the SAT and ACT remained below the national averages. For the SAT, Texas scores are 23 points lower, 873 compared with 896 for the nation. For the ACT, the comparison is 19.9 for Texas to 20.6 for the nation. At the state level, the number of students taking the tests has an inverse correlation with average scores, in that states with higher averages typically have a lower percent of students tested.

Students taking the SAT reported information on academic preparedness, parental education, and income. Students' SAT scores tended to increase with increasing numbers of academic courses completed, higher levels of parental education, and higher levels of parental income. Similar relationships existed with ACT test score results. *Exhibit 14* shows the relationship between years of study in academic subjects and SAT total scores.

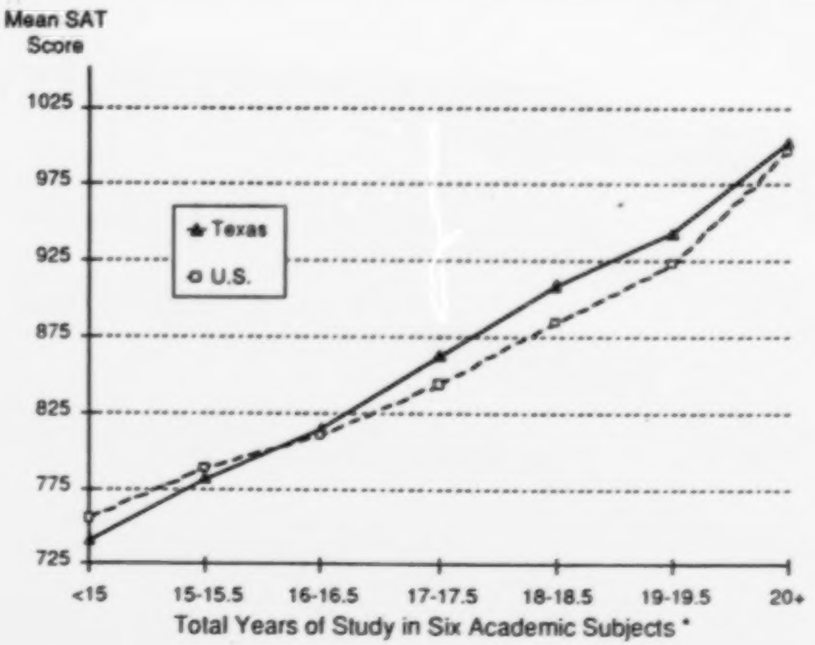
The lower level of academic preparedness also offers one possible explanation for the lower SAT and ACT test scores exhibited by African American, native American, and Hispanic students compared with the higher scores of white and Asian students. On average white and Asian students tended to complete greater numbers of academic courses than students in the other ethnic groups.

On both the SAT total and ACT composite, males scored higher on average than females. Although women achieved higher scores on the English and reading components of the ACT, the higher mathematics and science reasoning scores obtained by men offset this edge. The rigor of the academic courses is one explanation for the differences between male and female scores. Disproportionately more men than women enrolled in advanced science courses such as chemistry and physics, and mathematics courses such as geometry, trigonometry, and calculus.

Analysis of the combined performance of students taking either the ACT or the SAT shows that both the percentage of graduates taking the tests and the percentage scoring at or above the AEIS criterion (1000 on the SAT; 25 on the ACT) were highest in wealthy districts and districts suburban to the major urban districts. See the group information in the *Detailed Statistics* section.

EXHIBIT 14

SAT Scores for 1990-91 Seniors by Years of Academic Study



* English, Mathematics, Social Science and History, Natural Sciences, Foreign Languages, and Arts and Music

For both Texas and the nation, test scores rise with academic preparedness. Given comparative levels of preparation, Texas' scores equal or slightly exceed the national totals. Since the mean SAT scores for Texas are lower than those of the nation, this implies that students in Texas take fewer years of academic units on average than do SAT examinees nationwide.

DISTRICT STAFF

School district staff include professionals, educational aides, and auxiliary staff. Professional staff are teachers, central and campus administrators, and professional support staff such as supervisors, counselors, and librarians. Full-time equivalent (FTE) counts increased 3.4 percent and average base salaries increased 2.7 percent for professional staff since the fall of the 1990-91 school year.

STAFF COUNTS

As illustrated in *Exhibit 15*, teachers comprise the largest single category of staff. They account for 84 percent of professional staff and 53 percent of all staff. Teacher FTEs in 1991-92 are 3.3 percent higher than 1990-91 counts. This rate of growth is greater than the 2.4 percent increase exhibited in the student population.

As in 1990-91, professional support staff showed the most growth, 8.5 percent. This is a marked increase over the prior year growth of 4.75 percent. Support staff also account for a greater percentage of all employees this year, 5.7 percent compared with 5.4 percent in 1990-91. In contrast, the rate of growth among administrators declined between 1990-91 and 1991-92 by almost 2.0 percent. Administrators now comprise 4.2 percent of all staff; down from 4.4 percent in 1990-91. Much of this decline may be attributed to the reclassification of registrars and department heads as professional support staff rather than administrators. Also, recent focus by the legislature on excessive district administrative costs may have affected the number of administrators employed. Administrators and support staff considered together increased by 3.8 percent over 1990-91.

The 456 districts with between 500 and 3,000 students experienced increases in all categories of professional staff. All other groups of districts reported fewer administrators than last year. In these other groups, professional support staff grew at rates that far exceeded the loss of administrators. *See Exhibit 16.* It is possible that districts attempting to restructure without additional funding may be redirecting their resources.

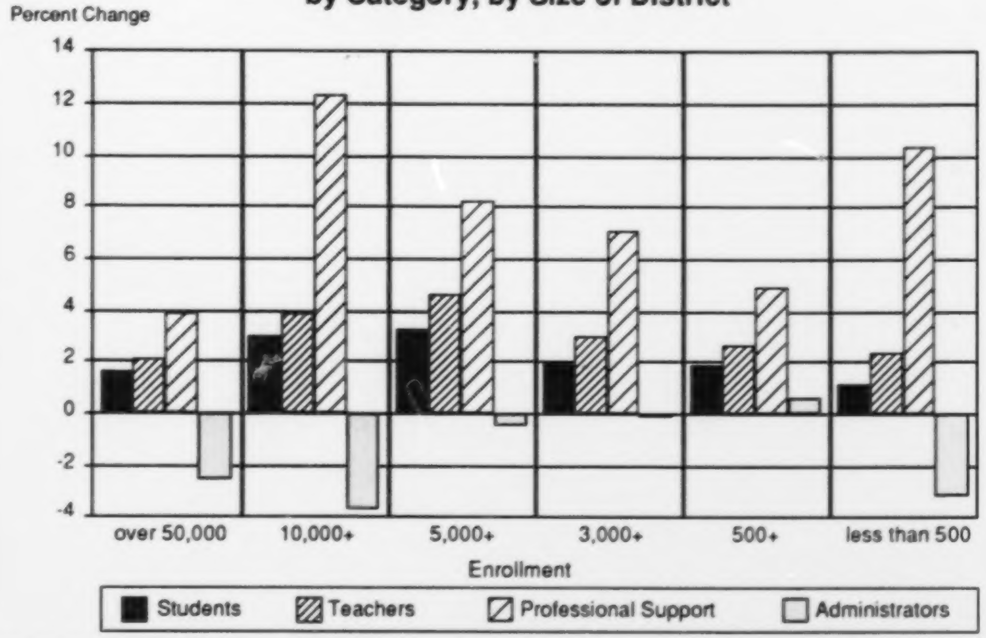
Patterns of growth in the teacher population reflect student growth. On average, the teaching force grew in all categories of district size

EXHIBIT 15
District Staff by Category

Category	FTEs	Percent of Total	Average Salary Base Pay Only	Average Salary (Including Supplements)
Teachers	212,578	52.8%	$27,557	$29,041
Campus Administrators	10,466	2.6%	$43,933	$44,178
Central Administrators	6,311	1.6%	$49,356	$49,688
Professional Support	23,046	5.7%	$33,491	$33,728
TOTAL PROFESSIONALS	252,401	62.7%	$29,323	$30,600
Educational Aides	33,729	8.4%	$10,626	$10,665
Auxiliary Staff	116,417	28.9%	$13,208	$13,208
TOTAL STAFF	402,547	100.0%	$23,100	$23,901

*See Exhibit E in the **End Notes** for a list of positions assigned to each of these categories. Supplements are amounts paid in addition to an employee's base salary and include such things as career ladder, athletics, club sponsorships, and band or orchestra.*

EXHIBIT 16
One Year Change in Professional Staff Counts by Category, by Size of District



"Administrator" includes positions such as superintendent, principal, business manager, and administrative officer while "Professional Support" includes therapists, psychologists, counselors and social workers, physicians and nurses, and librarians. At least part of the apparent decrease in administrative staff is the result of the reclassification of some positions as professional support.

at rates exceeding student growth by a margin of 0.5 percent to 1.4 percent. A possible explanation for this is that some districts responded to the mandated lower class sizes in the elementary grades by increasing class sizes in the higher grades. Now they may be trying to equalize class sizes given recent policy recommendations such as increased planning and professional development time for teachers and greater emphasis on individual student needs.

Counts of educational aides increased by 8.1 percent, almost twice the rate of growth in the prior year. Auxiliary staff, the second largest single category of staff at 29 percent, increased by 1.4 percent. Auxiliary staff include secretaries, bus drivers, maintenance workers, and cafeteria workers.

There was very little change in the ethnic composition of district staff for 1991-92. Approximately 33 percent of all staff employed in Texas public schools are minorities: 21.6 percent Hispanic, 11.2 percent African American, and 0.6 percent Asian/Pacific Islander and native American. Among teachers, minorities account for 23 percent of the total.

TEACHER EXPERIENCE

The average teacher in 1991-92 has 11.3 years of total teaching experience. Tenure, or longevity within a particular district, averages 7.7 years. These averages have varied only slightly over the last decade.

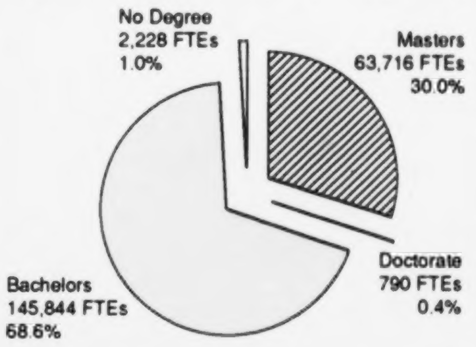
TEACHER CREDENTIALS

To teach in public schools in Texas, individuals must earn appropriate certification by satisfying a combination of education, experience, and test requirements that vary depending upon the avenue of certification pursued.

Education

A bachelor's degree is the highest degree earned by most Texas teachers, 69 percent. An additional 30 percent have earned master's or doctorate degrees. Approximately 1 percent, composed of certain vocational education teachers who can be certified by meeting other experience and education requirements, are reported as having no degree. *See Exhibit 17.*

EXHIBIT 17
Highest Degree Held for Teachers



Most Texas teachers hold bachelor degrees (69 percent). This statistic has remained relatively stable over the past five years.

Certification

Students seeking to enter an approved certification program in a Texas university must pass a basic skills test under the Texas Academic Skills Program (TASP). Upon graduation, students must pass one or more tests for the content area in which certification is sought, under the Examination for the Certification of Educators in Texas (ExCET) program.

Teachers certified by other states who seek Texas certification must also meet the ExCET test requirement. Most teachers obtain their credentials by graduating from university-based programs and passing the appropriate certification tests.

Texas offers an alternative certification process for degreed graduates in disciplines other than education. These candidates must pass a basic skills examination to enter the program, successfully complete a one-year internship, and then pass the appropriate ExCET examinations to obtain certification. Since its inception in 1985-86, the number of school districts participating in alternative certification programs has grown from 1 to 266.

Teachers certified in Texas before 1986 must pass the Texas Examination of Current Administrators and Teachers (TECAT) to revalidate their certification for employment in Texas public schools. Teachers who hold a current Texas certificate may obtain additional certification by passing the appropriate ExCET examination.

In 1990-91, almost 33,000 individuals took one or more ExCET examinations for the first time. Of the 21,091 examinees seeking initial certification during that year, the vast majority were recent graduates (71 percent), while out-of-state teachers comprised 24 percent and alternative certification candidates comprised 6 percent. The success rate for all ExCET tests attempted for the first time (62,529 tests taken) was 85.2 percent.

Permits

Teachers, counselors, principals, and certain administrators who have not yet earned the appropriate certification may be granted one of five types of permits in order to perform their duties. A permit must be acquired for a non-certified person to teach, for a teacher to undertake counseling or administrative duties, or for a teacher to teach out of field.

The TEA must authorize the nonrenewable permit, emergency teaching permit (ETP), special assignment permit (SAP), and vocational permit. A district superintendent may authorize the temporary classroom assignment permit (TCAP) for a teacher to teach more than one class out of field at the secondary level.

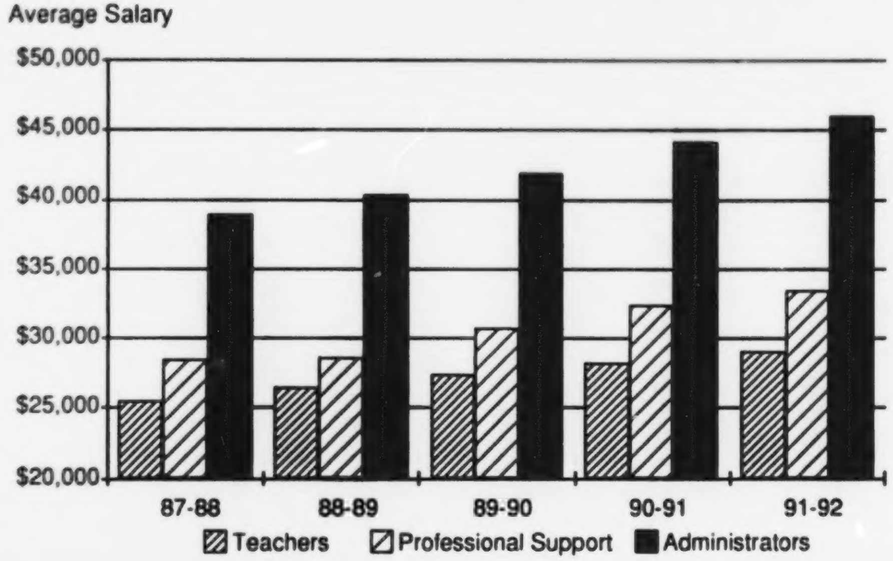
Statewide 4.1 percent of teachers hold an active permit of some type, approximately the same percent indicated in the previous three years.

PROFESSIONAL SALARIES

In 1991-92, professional base salaries grew 2.7 percent, to $29,323 from the 1990-91 school year. Total salaries, including reported supplements, climbed to $30,600, a 2.6 percent increase. Supplements are amounts paid in addition to the base salary contracted for an employee's regular duties. Supplements are paid for such things as career ladder, athletics, club sponsorships, and band or orchestra assignments.

Teacher total salaries increased by 2.5 percent, to $29,041. On average, professional support staff earn $33,728, central administrators, $49,688, and campus administrators $44,178. Central administrative salaries exhibited the greatest percent increase, nearly 4.6 percent, closely followed by campus administrative salaries with a 4.1 percent increase. *Exhibit 18* depicts trends in professional salaries since 1987-88.

EXHIBIT 18
Trends in Professional Salaries: 1988 to 1992



Between 1987-88 and 1991-92 the average teacher salary in Texas rose from $25,558 to $29,041. Nationally, average teacher salaries are $34,148. Texas ranked 35th among the states in 1991-92 on this measure. Salaries in this exhibit reflect base pay only for professional support and administrative staff. Teacher salaries include career ladder supplements for all years shown.

Analysis of salary increases by size and type of district indicate the greatest increases occurred in large, urban districts. Growth of teacher base salaries in the eight largest districts increased 3.9 percent on average this year compared with 4.2 percent a year ago. The smallest districts in the state, those with fewer than 500 students enrolled, exhibited increases in teacher base salaries of 1.2 percent, much less than the 3.5 percent growth this group experienced in 1991. Not only are teacher salaries increasing at a diminished rate, the gap between the increases experienced in urban versus rural areas is becoming more pronounced.

TEACHER CAREER LADDER

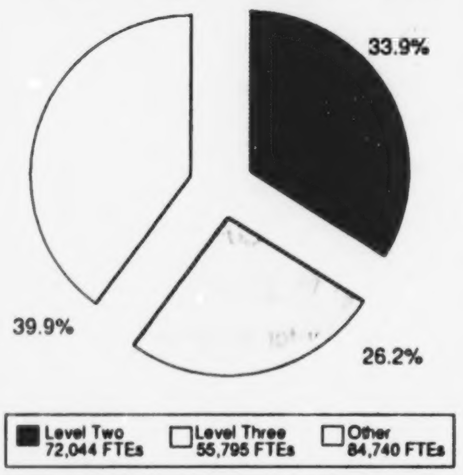
A career ladder for teachers was mandated by the legislature in 1984 and first implemented in the 1984-85 school year. The system was initiated to reward excellence in the teaching field and to attract talented students to the teaching profession by raising teacher compensation.

The career ladder has four levels; however, as of the 1991-92 school year only levels one, two, and three have been implemented. Placement decisions are made by the employing district and are based on job performance, education, and years of experience.

Teachers meeting specified performance standards and placed on levels two or above are eligible to receive salary supplements. State law establishes the range for these supplements and the state allots each district money for the career ladder on a per student basis. In 1991-92 districts received $90 for each student in average daily attendance to be used to supplement the salary of each teacher above level one.

The ranges for supplement amounts for teachers on level two are $1,500 to $2,000; and for teachers on level three, $3,000 to $4,000. Estimates of the average supplement amounts paid in this year are $1,610 and $3,171 for levels two and three, respectively. These estimates are based on the total supplement amounts reported for teachers placed on levels two or three. However, districts report supplement amounts for only about 36 percent of the teachers identified as being on levels two or three. The nearly 85,000 teachers not on level two or three are either on level one or were reported with no career ladder assignment. These teachers are not eligible for supplements. *See Exhibit 19.*

EXHIBIT 19
Teachers on the Career Ladder



The number of teachers placed on level three is increasing as more teachers are gaining the experience needed to qualify for the higher level. In 1991-92, 26 percent were placed on level three compared with 23 percent last year.

FINANCES

Funding for public education in Texas comes from four major sources: local, state, county education district (CED), and federal. Local and CED funding is derived from taxes on district property wealth. State funding is based on legislative appropriations determined through a statutorily-defined finance system. Federal funds are appropriated by Congress, generally for specific purposes.

STATE FUNDS

State funds for public education in Texas are distributed through a two-tiered system of formulas known as the Foundation School Program (FSP). In 1989 and 1990, the FSP underwent significant revision during the 71st session of the Texas legislature in response to the *Edgewood v. Kirby* litigation. Senate Bill 351, passed by the 72nd legislature and effective August 26, 1991, provided for an additional funding source for each district, the CED. Funds from taxable property are now generated by two entities: the local district and the CED. Federal funds flowing through the state to school districts are not a factor in the state system of financing Texas public schools.

Tier 1

The first tier of the FSP is a financing system made up of a series of allotments designed to ensure that each school district can provide instructional programs suitable to meet the minimum educational needs of its students. Allotments are calculated using various student counts. These include Average Daily Attendance (ADA), head counts based on identified characteristics such as family income, and full-time equivalent student counts modified by program or instructional arrangement weights. For the 1991-92 school year, the basic allotment for each weighted pupil in ADA, was increased from $1,910 to $2,200.

County Education District $
Available School Fund
Low
Property Wealth per Student
High
Unequalized Enrichment
Tier 2 (Guaranteed Yield)
Tier 1
Budget Balanced Districts

In tier 1, local funds are generated by the CEDs which tax property within their boundaries at a statutorily-required rate of $0.72 per $100 of valuation. To provide equity, the state provides additional funds to CEDs with low wealth to maintain an average funding level of $3,132 per ADA. Tier 2 provides additional, or enrichment funds, generated when districts (rather than CEDs) tax property above the CED rate. In districts with wealth in excess of $215,000 per weighted pupil (indicated by the broken line), a penny of tax effort generates more than $21.50 per pupil, resulting in unequalized enrichment.

State and local districts share in providing the calculated allotments. The share for each depends primarily on the property tax base of the school district. As of 1989-90, districts were required to raise their share of the first tier of the FSP, called the local fund assignment (LFA), as a condition of receiving the state share.

CEDs

Beginning with the 1991-92 school year, a second taxing entity, the CED, replaced the local district in generating revenue for the LFA and, for school finance purposes, substantially equalized the wide range of district property tax bases. The 188 CEDs, which are made up of one or more counties, generate and distribute this LFA revenue to each school district within the CED.

Each CED was required to levy a mandatory property tax of $0.72 in 1991-92. Before SB 351, very wealthy districts could raise their LFA with a tax rate lower than this minimum required tax rate. These districts, known as budget-balanced districts, disproportionately contributed to the inequity in the school finance system. To guarantee the equity of the first tier of the FSP system, districts which were budget-balanced were combined with other districts to create CEDs. No CED is budget-balanced.

Tier 2

The FSP revised by SB 351 retained the guaranteed yield program begun in 1989-90 to provide additional funds to districts. This level of financing, often called the second tier, enables low wealth districts to earn additional state aid by setting their tax rate above the minimum level required for the first tier of the FSP.

For each penny of tax effort the district levies above the first tier requirement, up to an additional $0.45, the state will guarantee a yield of $21.50 per penny, per weighted student. The maximum guaranteed yield amount for 1991-92 is $968 per weighted student. The effect of a guaranteed yield program is to increase the tax base available to property-poor school districts.

Exhibit 20 illustrates the relationship between district wealth and state funding for both the basic allotment and guaranteed yield tiers of the FSP. In both tiers, poorer districts receive a larger percentage of their revenue from the state while wealthier districts fund their operations with a greater percentage of local funds.

Like *Exhibit 20, Exhibit 21* shows the inverse relationship between wealth and state aid. It also highlights the fact that the local effort of the wealthiest group of districts generates more revenue than the combined state, local, and federal amounts of the poorer groups. In the remaining 90 percent of districts however, total revenue per pupil does not vary substantially due to wealth because of the FSP structure.

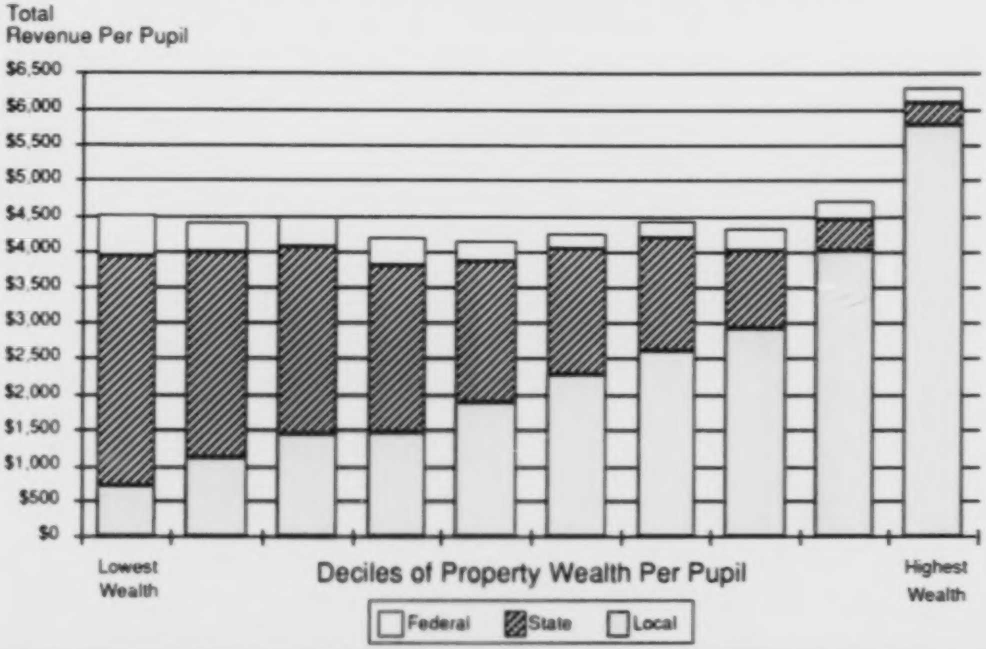
LOCAL FUNDS

Local funds for public education are raised primarily through the local property tax. Taxes are levied against locally assessed property rolls to generate revenue. All tax rates shown in this publication are effective tax rates, calculated using the market value of property estimates from the Comptroller's Property Tax Division (CPTD). Locally adopted rates are not used for inter-district comparisons because they do not control for variation in local appraisal practices.

Districts set two tax rates each year, one for maintenance and operations (M&O) and another for debt service, called the interest and sinking fund rate (I&S). M&O tax rates are subject to a statutory maximum of $1.50 per $100 assessed valuation. If the amount of taxes levied in a given year exceeds the preceding year's levy by eight percent, voters may petition for a tax roll back election. Districts set their local M&O rate to generate revenue above the statutorily-defined CED rate. I&S tax rates are not subject to the same limitations as those for maintenance and operations.

Item 67 in the *District Detail*, total tax rate, includes the CED tax rate plus the district M&O and I&S rates.

EXHIBIT 21
Average Revenue Per Pupil by Source, by Wealth Decile



The FSP is designed to deliver proportionately more funds to those districts less able to generate local funds. Approximately 10 percent of the districts in the state are represented by each bar on this graph.

Change in Property Tax Rates

Increases in local tax effort have been dramatic during the last decade. The total average effective tax rate has risen from $0.66 per $100 valuation in 1985-86 to $1.16 in 1991-92, a 76 percent increase in six years. *See Exhibit 22*. The M&O effective tax rate shown for 1991-92 in this exhibit includes both the $0.72 CED rate and the

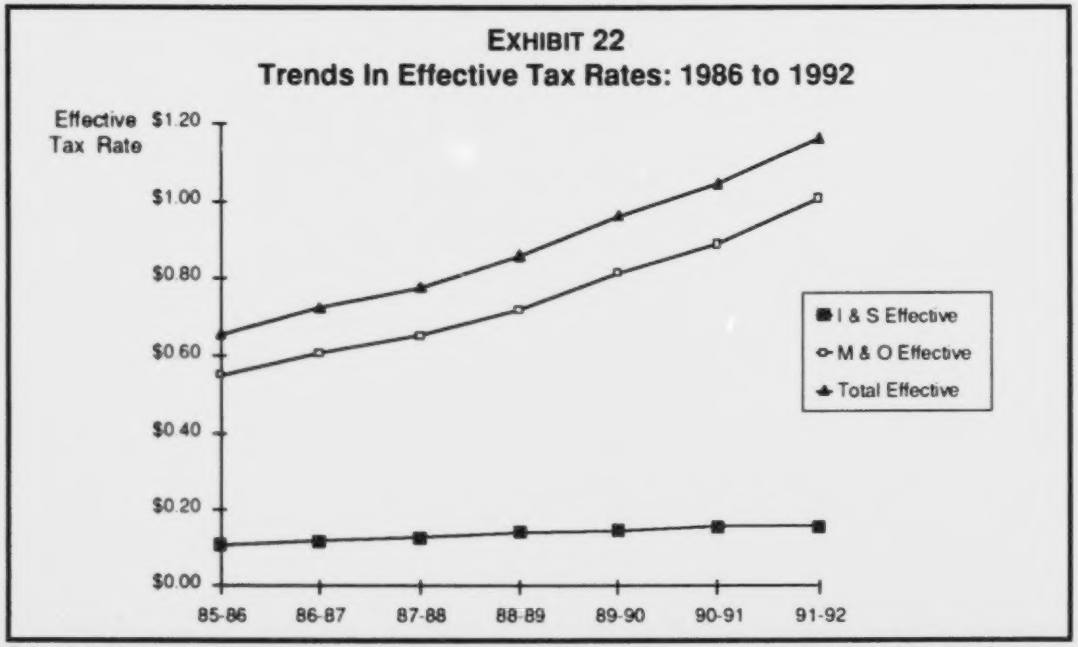


EXHIBIT 22
Trends In Effective Tax Rates: 1986 to 1992

School district tax rates continue to increase, driven by falling property values, a growing student population, and in recent years, by legislative incentives for districts to raise their tax effort to receive state equalizing funds. The M&O rate depicted in 1991-92 is composed of the local M&O rate plus the minimum required CED rate. An increase in the minimum required rate, from $0.54 in 1990-91, to $0.72 in 1991-92 has also contributed to the increase in the total rate paid by taxpayers.

state average school district M&O rate. Almost all the districts in the state (90 percent) now have total effective rates over $1.00, compared with only 173 districts (16 percent) with rates of this magnitude six years ago.

Statewide taxable property values in 1991-92 totalled $630 billion, approximately the same amount as in 1990-91 and over $72.1 billion less than they were at their peak in 1985-86. The rate of property value decline has been diminishing in recent years; taxable values for the 1992-93 school year are expected to exceed the 1991-92 values.

Given falling property values, school districts must tax at higher rates in order to generate the same levy amount as in prior years. In districts with increasing enrollment, taxes must be even higher to generate the same levy amounts per pupil.

Additional factors contributing to increased local effort include an increase in the minimum required tax rate with the advent of CEDs (from $0.54 to $0.72 between 1990-91 and 1991-92) and incentives within the guaranteed yield which encourage districts to boost their tax effort in order to receive state equalizing funds. A common local tax effort response of many school districts has been to hold their local M&O tax rate constant in the face of scheduled increases in the CED rate. The change in district total average tax rate from 1991 to 1992 ($0.12) is less than the increase in the minimum LFA or CED tax rate for the same year ($0.18), illustrating the districts' tendency to allow state required increases to drive total tax rate increases.

FEDERAL FUNDS

Almost all federal funds are appropriated by Congress for specific programs or specific populations of students. These funds must be expended for designated purposes.

The majority of these federal funds must be spent to supplement programs already in place, not to relieve the state of its financial obligation to provide programs that address the needs of special students. Often, the federal appropriations permit local and state use of each state's allocation. The portion of the state's allocation to be spent by local school districts is distributed on a formula basis. The remaining allocation is discretionary and may be spent at either the state or local level.

Examples of federal funds distributed to school districts are the National School Lunch Program, various special education funds, and the Elementary and Secondary Education Act Chapter I program for low-income students.

ACCOUNTING FOR THE SYSTEM

Texas public school districts use a uniform accounting system to record revenues and expenditures. Other entities, such as regional service centers and county, state, and federal governments also receive and spend funds on behalf of public education in Texas. District revenues, in combination with the revenues of these other entities, are referred to as total receipts. All expenditures made by local school districts, plus the additional expenditures made by all other entities for public education are referred to as disbursements.

RECEIPTS

The major sources of revenue for public education are the state FSP and the tax revenue generated at the local level by districts and CEDs. *Exhibit 23* shows all receipts and disbursements on behalf of public education by source. *Receipts* equal total revenue from all sources plus other resources; *disbursements* equal total expenditures by all spending entities plus other uses. Other resources and other uses are related to local debt obligations.

Local revenue, $8.0 billion, represents only those funds received directly by school districts. State revenue, $7.4 billion, includes FSP funding and other items such as textbook purchases and state-matching contributions to the Teacher Retirement System. Additional revenue sources shown in the exhibit include federal funds and county and service center contributions. Other resources are the local issuance of debt and income from the sale of assets.

EXHIBIT 23
1991-92 Receipts and Disbursements by Source

Originating Source	Receipts	Pct. of Total	Disbursements	Pct. of Total	Spending Agents
Local	$7,994,293,348	43.1%	$16,004,289,958	90.2%	Local
State	$7,396,826,856	39.9%	$933,099,272	5.3%	State
Federal	$1,328,850,275	7.2%	$47,709,554	0.3%	Federal
Other (ESC and County)	$65,492,379	0.4%	$147,800,843	0.8%	Other (ESC and County)

Other Resources (Debt)	$1,763,921,818	9.5%	$601,541,111	3.4%	Other Uses (Debt)
TOTAL RECEIPTS	$18,549,384,676	100.0%	$17,734,440,738	100.0%	TOTAL DISBURSEMENTS

The sources of the data shown are TEA accounting records, the TEA's budget request to the Legislative Budget Board, and financial data reported to the TEA by all school districts. Revenues and expenditures in this exhibit do not match revenue and expenditure items in the ***District Detail*** *for two reasons: 1) the* ***Detail*** *reports budgeted information while this exhibit shows estimated actual amounts, and 2) the* ***Detail*** *shows revenue and expenditures of only one entity involved in public education spending: local school districts. Note that revenues from CED taxes are included in the local revenue category.*

Total receipts in 1991-92 increased almost 9.4 percent over 1990-91. The greatest growth in receipts (16.5 percent) occurred in the "Other Resources" category due to an increase in the proceeds from bonds, loans and the sale of assets. In 1991-92, nearly three times more debt was issued by school districts than was retired.

District Revenues

Total revenue from all sources totalled $16.8 billion in 1991-92, and of this, $15.3 billion was budgeted by local school districts. This represents an increase of 9.5 percent over 1990-91. The remaining $1.5 billion available for public education is not budgeted by local districts, although a portion of this amount is expended at the local level. This is due to the fact that districts historically underbudget the revenues they actually receive.

Exhibit 24 shows district budgeted revenues by source. Local revenues increased 11.3 percent relative to 1990-91, while state revenues increased by 7.3 percent, and federal revenues increased by 9.8 percent. Local funds comprise 52.2 percent of total revenues in 1991-92, a slight increase over the 51 percent attributable to local funds in 1990-91. The vast majority of these local funds, 90 percent, are from local property taxes. Federal revenues as a percentage of the total remained the same at 7.3 percent. In any district, the composition and level of revenue sources may vary substantially from the state average depending upon local wealth and qualifications for federal assistance.

Historically, the local portion of total revenues has risen from a low of 48 percent in 1984-85 to a high of nearly 53 percent in 1989-90. Conversely, the state portion had steadily decreased from a high of 46 percent in 1984-85 to a low of 40 percent in 1989-90. In 1990-91, due to an additional $500 million injected into the system as a result of Senate Bill 1, 71st Legislature, Sixth Called Session, the percent of revenue from state funds increased to 41.4 percent. This boost of state funds stabilized the decline of the state share and represented the first major influx of state funds since House Bill 72 in 1984-85. However, in 1991-92, additional state revenue was more than matched by increases in local revenue and the state portion of school district revenue decreased to 40.5 percent.

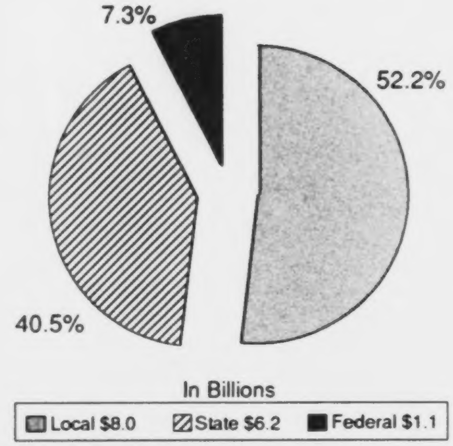
DISBURSEMENTS

As *Exhibit 23* shows, almost 90 percent of the disbursements for public school education are made by local school districts. The remaining 10 percent are expended directly from other governmental entities such as state, county and federal governments, and ESCs. Examples of state disbursements include expenditures for textbooks, state-administered schools, the Teacher Retirement System, and the TEA.

District Expenditures

Expenditures are recorded by fund, function, object, and in some cases, by program. Functions describe the broad purposes of expenditures, such as instruction or administration.

EXHIBIT 24
Revenue by Source



District budgeted revenue from all funds (except the capital outlay fund) is apportioned by source. Debt service funds are included. These funds are almost entirely generated from local sources, which has an impact on this distribution.

Object classifications describe the service or item purchased. Program classifications must be used to identify instructional areas and/or arrangements, such as the regular, special, vocational, and bilingual education programs. See *Exhibit 25* for the distribution of various expenditure categories by function, object, and program.

In 1991-92, local school district budgeted expenditures totalled $15.4 billion, or $4,452 per pupil, an increase of 8.6 percent over 1990-91.

Expenditures by Function. Expenditures for instruction accounted for over half (51.5 percent) of all budgeted funds. These costs include all activities dealing directly with the instruction of pupils, including teacher and educational aide salaries, instruction through the use of computers, and classroom equipment purchases.

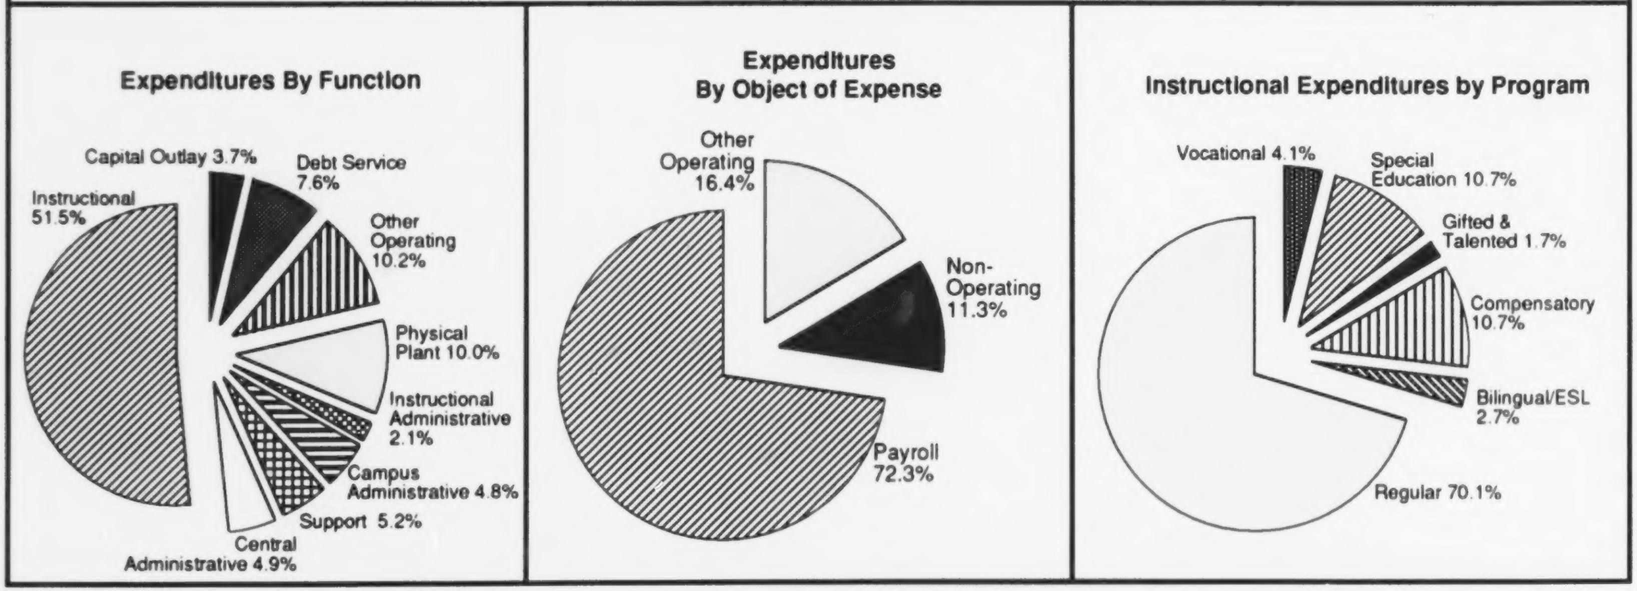
Other major expenditures by function are for support services which include libraries and pupil services, 5.2 percent; administration, 11.8 percent; and plant services, 10.0 percent.

Expenditures by Program. Instructional expenditures are also categorized by program. In 1991-92 $7.9 billion was budgeted to this level. The majority of these funds, 70 percent, are spent on the regular program. The remainder is spent for special education, 10.7 percent; compensatory education, 10.7 percent; vocational education, 4.1 percent; bilingual education / English as a second language programs, 2.7 percent; and gifted and talented education, 1.7 percent.

Expenditures by Object. By object of expense, payroll represents 72.3 percent of all school district expenditures. Expenditures under "other operating" which include purchased and contracted services, and supplies and materials, account for an additional 16.4 percent of the budget. Debt service and capital outlay, both non-operating categories, make up the remaining 11.3 percent.

School district object expenditures are divided into current operating and non-operating categories. Current operating expenditures are all salaries, services and supplies. Non-operating expenditures include the construction or remodelling of facilities, and the

EXHIBIT 25
Expenditure Analyses



Expenditures by function and object depict total expenditures budgeted by districts for 1991-92. The third pie chart, instructional expenditures by program, is a more detailed analysis of the "instructional" function portion (51.5 percent) depicted in the first pie chart.

repayment of debt. *Exhibit 26* depicts the increases in per pupil operating expenditures that have occurred since 1986-87. Payroll accounts for 82 percent of current operating expenditures and includes salaries, wages, and employee benefits for school district employees.

Exclusion of Funds

Some funds have been excluded from the figures presented in this document to allow for greater comparability among districts. These funds are associated with districts involved in cooperatives, tuition transfers, and capital projects.

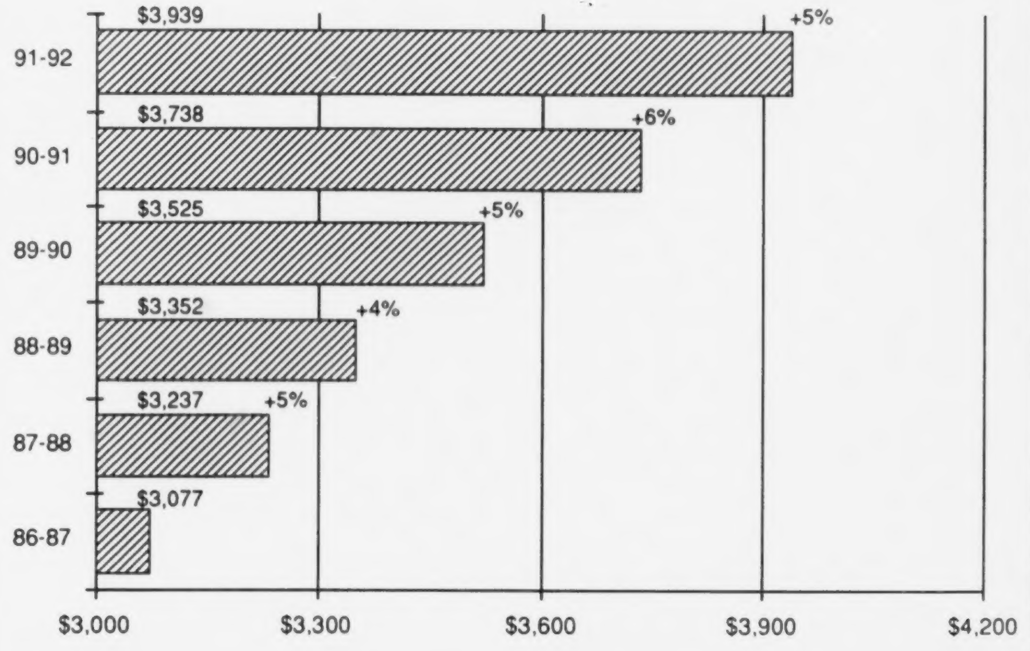
Cooperatives. Some districts participate in cooperative arrangements with other districts. The fiscal agent or manager of the cooperative may be another district, an ESC, or a county. One of the most common types of cooperatives is a special education cooperative, where special education services are shared among member districts. An indicator is shown in the *District Detail* for each district that participates in, or is a fiscal agent of, a special education cooperative. These districts may have per pupil expenditure amounts that differ from expectations because students served through the fiscal agent are not necessarily enrolled in the fiscal agent district. To correct for this problem, any amounts budgeted in fund group 80, fiduciary fund types, have been excluded from the *District Detail* figures presented in this document. Total revenues and expenditures reported in fund group 80 are approximately $81.9 million and $100.7 million, respectively.

Tuition Transfers. Some districts, typically those without a high school, pay tuition to another district to serve their high school-aged pupils. (Item 3 in the *District Detail* indicates when fewer than 12 grades are offered.) Expenditures budgeted for tuition transfers have been excluded from the financial information presented here. See the *End Notes* for further details.

Capital Projects Fund/Facilities. Fund 60, where all capital projects are accounted for, has also been excluded to allow for better comparability between districts.

In response to increasing enrollments, school districts have consistently increased indebtedness to expand facilities, and debt service payments have risen as a result. For the

EXHIBIT 26
Trends in Operating Expenditures per Pupil: 1987 to 1992



Budgeted operating expenditures per student have increased 28 percent since 1986-87. Percentages shown represent year-to-year change.

1990-91 school year, the last year for which data are available, total school district debt was approximately $8.3 billion, compared to $4.7 billion in the 1981-82 school year.

During the past three years, school districts have been spending approximately $1 billion annually to meet their debt service obligations, including principal and interest. For the 1991-92 school year, districts reported that they anticipate collecting $982 million in debt service tax revenues. Debt service payments will exceed $1.1 billion, or 7 percent of all school district expenditures, excluding capital outlay.

The average tax effort needed to raise this year's debt service is approximately $0.165 per $100 of assessed valuation. Nearly 70 percent of all school districts have debt service payments. Among these districts, the average effective rate is $0.19; however, more than 200 districts report rates above $0.40.

Detailed Statistics

Extensive information about students, student performance, district staff, and district finances for 1991-92 follows. Group summary tables and distribution tables are presented on pages 30 through 53, followed by individual school district level data beginning on page 54.

Category Descriptions

Items are summarized by district size, community type, property wealth, total effective tax rate, and ESC region. A description of each of these summary groups is provided below:

Enrollment Groupings

Districts are grouped into nine size categories according to their total student enrollment for the year. Districts of similar size are grouped together.

Community Type

Districts are classified on a scale ranging from major urban to rural. Factors such as size, growth rates, and proximity to an urban area are used to determine the appropriate group. The groups are:

Major Urban. The eight largest school districts in the state which serve the metropolitan areas of Houston, Dallas, San Antonio, Fort Worth, Austin, Corpus Christi, and El Paso.

Major Suburban. Other school districts in and around the major urban areas.

Other Central City. The major school districts in other large Texas cities.

Other Central City Suburban. Other school districts in and around the other large, but not major, Texas cities.

Independent Town. The largest school districts in the counties with populations of 25,000 to 100,000.

Non-Metro: Fast Growing. The school districts that fail to be in any of the above categories and that exhibit a five-year growth rate of at least 20 percent. These districts must have a population of at least 300 students.

Non-Metro: Stable. The school districts that fail to be in any of the above categories, yet have a student population that exceeds the state median.

Rural. The school districts that fail all of the above tests for placement into a category. These districts have enrollment between 300 and the state median and a growth rate less than 20 percent, or they have enrollment less than 300.

Total Effective Tax Rates

Districts are grouped into four categories, or quartiles, with approximately equal numbers of districts in each. The category shows the total effective tax rate, which is the sum of the school district maintenance and operation and debt service effective tax rates plus the county education (CED) effective rate. The components of this total rate are calculated by dividing the 1991 levies by the 1991 comptroller's taxable value. The six special statutory districts do not levy property taxes.

Property Wealth

Wealth is defined as total taxable property value per student enrolled and is used as an indicator of a district's ability to raise local funds. The property value used is 1991 taxable value as determined by the Comptroller's Property Tax Division (CPTD). Districts are classified into 20 categories with approximately equal numbers of students in each, or approximately five percent of total enrollment per category. The six special statutory districts form the 21st group because they have no taxable property wealth.

Education Service Center Regions

The state is divided into 20 geographic regions, each served by an Education Service Center. The number of districts assigned to each ESC region varies.

Distribution Statistics

This information is presented to help readers better understand the distribution of a particular item among Texas public school districts. By examining the variance between the high, low, and intermediate values, it is possible to determine whether districts behave similarly, as in the case of pupil to teacher ratios, or very differently, as in the case of the number of students enrolled.

Each item is analyzed independently: the district with the highest value for one item is not necessarily the district with the highest value for other items. The terms used are defined below:

Lowest (Highest) Value. For any given item, the lowest (highest) value found among all the districts.

XXth Percentile. For any given item, a value chosen such that XX percent of the school districts are below the chosen value. For example, the 10th percentile means that 10 percent of the school districts have values lower than the value shown.

Median. For any given item, a value chosen such that half of the school districts are below the chosen value, and half are above.

State of Texas. For most items this is the sum of all the reported district values. For ratios or percent calculations, the state total is computed as the sum of all the numerators, divided by the sum of all the denominators. For these items, the state statistics is a weighted state average.

District Detail

The information for school districts is sequenced such that all 92 data items are presented in a six page layout for approximately 30 districts at a time. The 92 items pertain to students, student performance, district staff, and district finances.

Districts are sequenced alphabetically within counties. Counties are numbered and are also arranged alphabetically. To locate a particular district by name, see the *District Listing* in the appendix. This listing provides the county and county number needed to find a district in the *District Detail* section. As with the grouped reports (size, type, tax effort, wealth, ESC regions) and *Distribution Statistics*, a state summary line concludes the *District Detail*.

Definitions of the 92 data items begin on page 264.

"LT5" indicates that more than zero, but fewer than five teachers were appraised; therefore, scores are masked to protect the teachers' anonymity.
"n/a" indicates "not applicable" or "not available."

ITEM DEFINITIONS

Items are defined in the sequence they appear in the *District Detail* section of the report. The data items are numbered to correspond with numbers used in the column headings. To ascertain data sources for these items, refer to the *Data Sources* appendix which cross references sources with the items defined below.

COUNTY NUMBER AND NAME: The county number is a unique identifier assigned to each county for administrative purposes. The numbers correspond to the alphabetic arrangement of county names.
(Source: Organization Master Files)

DISTRICT NAME: The name of the district which includes a designator for the governance system. These designators are:

ISD	INDEPENDENT SCHOOL DISTRICT A locally elected board of trustees governs the district.
CSD	COMMON SCHOOL DISTRICT The county commissioners court governs the school district.
MSD	MUNICIPAL SCHOOL DISTRICT The city council governs the school district.

Most school districts are independent school districts. Due to space limitations, the "ISD" designation has been omitted but other governance designators have been retained.
(Source: Organization Master Files)

REGION: The Education Service Center region to which the district is assigned based upon its geographic location. There are 20 ESCs serving districts in the various areas of the state.
(Source: Organization Master Files)

CO-OP STATUS: An indicator of whether or not a district participates in a Special Education cooperative. An "F" indicates the district is a fiscal agent, an "M" indicates the district is a member, and a blank means the district does not participate. For these districts, dollar amounts per student may be distorted because student counts and amounts budgeted may be reported by different districts. Districts participating in other types of cooperatives are not indicated.
(Source: Special Ed. Co-ops)

1. **STATE BOARD OF EDUCATION DISTRICT:** The number of the SBOE district to which the school district was assigned in 1991-92 based upon its geographic location. If a district is represented by more than one SBOE district, the district associated with the location of the central office is reported. See *Exhibit F*, the State Board of Education District Map, in the *End Notes* appendix.
   (Source: Texas Legislative Council Maps)

2. **ACCREDITATION STATUS:** The accreditation status of the district as of June 1992. Districts are classified as either FA-Fully Accredited; AC-Accredited with monitor or master; AD-Advised; AU-Academically Unaccredited; or SO-State-Operated.

   Accredited with monitor or master means the commissioner has assigned monitors or masters to assist these districts in specific areas needing corrective/improvement action.

   Advised means there are discrepancies between the district's program or operations and accreditation requirements.

   Academically unaccredited means the district's accreditation has been revoked by the commissioner due to failure to meet or maintain compliance with accreditation requirements.

   State-operated means the commissioner has declared a district that has been academically unaccredited for at least one year to be state-operated.

   As of June 1992, over 97 percent of the districts in the state were fully accredited. The status of districts changes continuously. The current status of any district may be different than that shown in this publication.
   (Source: Division of Accreditation)

3. **NUMBER OF REGULAR HIGH SCHOOLS:** The number of high school campuses in a district identified by the range of grades offered as reported to TEA. The most common grades offered for each of the types are: Elementary, grades K-6; Middle School, grades 6-8; Junior High, grades 7-8; High Schools, grades 9-12; Elementary/Secondary, grades K-12. See *Exhibit B* in the *End Notes* for the details of which grades offered fall into each category.
   (Source: Organization Master Files)

4. **TOTAL ENROLLMENT:** The number of students in membership as of October 25, 1991, in grades pre-kindergarten through twelve.
(Source: PEIMS, 110)

5. **FIVE YEAR % CHANGE IN ENROLLMENT:** The percent change in total enrollment for the five year period from 1986-87 to 1991-92.
(Sources: Fall Survey of Pupils; PEIMS, 110)

6. **% WHITE:** Percentage of enrollment reported as white.
(Source: PEIMS, 110)

7. **% AFRICAN AMERICAN:** Percentage of enrollment reported as African American.
(Source: PEIMS, 110)

8. **% HISPANIC:** Percentage of enrollment reported as Hispanic.
(Source: PEIMS, 110)

9. **% OTHER:** Percentage of enrollment reported as other. Other is the combination of Asian / Pacific Islander and native American counts.
(Source: PEIMS, 110)

10. **% ECONOMICALLY DISADVANTAGED:** Percentage of enrollment reported as economically disadvantaged. Economically disadvantaged students are those who are eligible for: free meals under the National School Lunch and Child Nutrition Program, reduced-price meals under the National School Lunch and Child Nutrition Program, or other public assistance.

    Students reported with any one of these three status codes may or may not be enrolled in a special program such as compensatory or special education.
    (Source: PEIMS, 110)

11. **% SPECIAL EDUCATION:** Students identified as participating in special education expressed as a percent of total enrollment. Students in special education may also be counted in another special program such as vocational or bilingual education.
(Source: PEIMS, 110)

12. **% BILINGUAL/ESL EDUCATION:** Students identified as participating in Bilingual Education or English as a Second Language (ESL) expressed as a percent of total enrollment. Students in bilingual/ESL education may also be counted in another special program such as special or vocational education.
(Source: PEIMS, 110)

13. **% VOCATIONAL EDUCATION:** Students identified as taking vocational education courses expressed as a percent of total enrollment. Students in vocational education may also be counted in another special program such as special or bilingual education.
(Source: PEIMS, 110)

14. **% GIFTED AND TALENTED:** Students identified and served in state-approved gifted and talented programs expressed as a percent of total enrollment. Students in gifted and talented education may also be counted in another special program such as vocational or bilingual education.
(Source: PEIMS, 110)

15. **DROPOUT RATE (*PRIOR YEAR*):** The total number of 1990-91 dropouts reported in grades 7-12 expressed as a percent of the total number of students enrolled in grades 7-12 in 1990-91. Students reported absent for a period of 30 or more consecutive days between September 1990 and August 1991 without prior approval or documented transfer to another public secondary school are included in this total. This total also includes students that failed to re-enroll at the beginning of the 1991-92 school year.

    Districts with 7th-12th graders which reported that no students dropped out have a zero (0) dropout rate. If dropout data are not required for a district because only lower grades are offered, then an "n/a" is printed. "LT5" will appear in cases where there were fewer than five 7th-12th graders to protect the students' anonymity.
    (Source: PEIMS, 110, 201)

16. **ATTENDANCE RATE:** Total average daily attendance (ADA) for the second six-week period expressed as a percent of average daily membership (ADM). Students in Early Education and Pre-Kindergarten through 12th grade are included.
(Source: PSR, Table I)

17. **GRADUATION RATE (*PRIOR YEAR*):** The number of 12th grade students who graduated during the 1990-91 school year, divided by the total number of 12th grade students enrolled in the fall of 1990. Special education students are not included.
(Source: PEIMS, 202)

18. **% GRADUATES WITH ADVANCED SEAL (*PRIOR YEAR*):** The number of 1990-91 12th grade graduates who received an advanced seal on their transcript expressed as a percent of total 12th grade graduates.
(Source: PEIMS, 202)

19. **% PASSING ALL GRADES:** For all grades and subject areas, the total number of students who passed all tests taken, expressed as a percentage of the total number of students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity. If no students were tested an "n/a" is printed.
(Source: TAAS)

20. **% PASSING GRADE 3 (ENGLISH):** For all grade three subject area tests (in English), the number of students who passed all tests taken, expressed as a percentage of the total number of students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity. If no students were tested an "n/a" is printed.
(Source: TAAS)

21. **% PASSING GRADE 5:** For all grade five subject area tests, the number of students who passed all tests taken, expressed as a percentage of the total number of students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity. If no students were tested an "n/a" is printed.
(Source: TAAS)

22. **% PASSING GRADE 7:** For all grade seven subject area tests, the number of students who passed all tests taken, expressed as a percentage of the total number of students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity. If no students were tested an "n/a" is printed.
(Source: TAAS)

23. **% PASSING GRADE 9:** For all grade nine subject area tests, the number of students who passed all tests taken, expressed as a percentage of the total number of students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity. If no students were tested an "n/a" is printed.
(Source: TAAS)

24. **% PASSING GRADE 11:** For all grade eleven subject area tests, the number of students who passed all tests taken, expressed as a percentage of the total number of students taking one or more tests. Grade 11 test results are reported for students taking the test for the first time only, and are from the October 1991 administration of the test. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity. If no students were tested an "n/a" is printed.
(Source: TAAS)

25. **% WHITE STUDENTS PASSING:** For all grades and subjects, the number of white students who passed all tests taken, expressed as a percentage of the total number of white students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity. If no students were tested an "n/a" is printed.
(Source: TAAS)

26. **% AFRICAN AMERICAN STUDENTS PASSING:** For all grades and subjects, the number of African American students who passed all tests taken, expressed as a percentage of the total number of African American students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity. If no students were tested an "n/a" is printed.
(Source: TAAS)

27. **% HISPANIC STUDENTS PASSING:** For all grades and subjects, the number of Hispanic students who passed all tests taken, expressed as a percentage of the total number of Hispanic students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity. If no students were tested an "n/a" is printed.
(Source: TAAS)

28. **% OTHER STUDENTS PASSING:** For all grades and subjects, the number of Asian / Pacific Islander and native American students who passed all tests taken, expressed as a percentage of the total number of Asian / Pacific Islander and native American students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity. If no students were tested an "n/a" is printed.
(Source: TAAS)

29. **% ECONOMICALLY DISADVANTAGED STUDENTS PASSING:** For all grades and subjects, the number of economically disadvantaged students who passed all tests taken, expressed as a percentage of the total number of economically disadvantaged students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity. If no students were tested an "n/a" is printed.
(Source: TAAS)

30. **% TESTED (*PRIOR YEAR*):** The count of graduating seniors who took either the Scholastic Aptitude Test (SAT) or the enhanced ACT of the American College Testing program at least once prior to May 1991 expressed as a percent of all graduating seniors.
(Source: SAT/ACT Files)

31. **% ABOVE CRITERION (*PRIOR YEAR*):** The count of graduating seniors who scored at or above the criterion score on either test (1000 on the SAT and 25 on the ACT) expressed as a percent of all graduating seniors.
(Source: SAT/ACT Files)

32. **SAT MEAN TOTAL SCORE (*PRIOR YEAR*):** The sum of the mathematics and verbal portions of the SAT divided by the number of graduating seniors tested. Total scores for the SAT range from 400 to 1600 and include only the most recent scores received by graduates on an SAT taken anytime during their high school years. Scores are reported for 12th graders who graduated during the 1990-91 school year.

    If no students were tested or no scores were reported, then an "n/a" is printed. "LT5" will appear in cases where fewer than five students were tested to protect the confidentiality of the students' test scores.
(Source: SAT/ACT Files)

33. **ACT ENHANCED MEAN COMPOSITE SCORE (*PRIOR YEAR*):** The average of the scores from the English, mathematics, reading, and science reasoning portions of the ACT. Composite scores for the ACT range from 1 to 36 and include only the most recent scores received by graduates during either the junior or senior years. Scores are reported for 12th graders who graduated in the end of the 1990-91 school year.

    Since October 1989, a revised ACT, the Enhanced ACT Assessment, has been administered. All uses of the term ACT in this publication refer to this revised test.

    If no students were tested or no scores were reported, then an "n/a" is printed. "LT5" will appear in cases where fewer than five students were tested to protect the confidentiality of students' test scores.
(Source: SAT/ACT Files)

34. **TOTAL STAFF FTE:** A count of all personnel employed by the school district as of fall 1991, including both professional and nonprofessional positions. All staff counts are expressed as full-time equivalents. The appropriate portion of an FTE is allocated to each of the responsibilities associated with an individual based on a percentage of total time worked.
(Source: PEIMS, 050)

35. **TOTAL TEACHER FTE:** The FTE count of personnel categorized as teachers, including special duty and substitute teachers.
(Source: PEIMS, 050, 090)

36. **% CENTRAL ADMINISTRATIVE STAFF:** The FTE count of personnel classified as administrators in the central office, expressed as a percent of total staff FTEs. Central office administrators include assistant superintendents, superintendents, business managers, tax assessor collectors, directors of personnel; as well as administrative officers, instructional officers and athletic directors if reported with a '700' campus code. See *Exhibit E* in the *End Notes* for a complete listing.
(Source: PEIMS, 050, 090)

37. **% CAMPUS ADMINISTRATIVE STAFF:** The FTE count of personnel classified as campus administrators, expressed as a percent of total staff FTEs. Campus administrators include assistant principals, principals; as well as administrative officers, instructional officers and athletic directors if reported with a campus code other than '700'. See *Exhibit E* in the *End Notes* for a complete listing.
(Source: PEIMS, 050, 090)

38. **% PROFESSIONAL SUPPORT STAFF:** The FTE count of personnel categorized as support staff expressed as a percent of total staff FTEs. Support staff are defined as therapists, psychologists, counselors and social workers, diagnosticians, physicians and nurses, librarians, supervisors, department heads, registrars and miscellaneous other support roles. See *Exhibit E* in the *End Notes* for a complete listing.
(Source: PEIMS, 050, 090)

39. **% TEACHERS:** The teacher FTE count expressed as a percent of total staff FTEs.
(Source: PEIMS, 050, 090)

40. **% EDUCATIONAL AIDES:** The FTE count of personnel categorized as educational aides expressed as a percent of total staff FTEs. Educational aides are involved in instructional support.
(Source: PEIMS, 050, 090)

41. **% AUXILIARY STAFF:** The FTE count of personnel categorized as auxiliary staff expressed as a percent of total staff FTEs. Auxiliary staff are those personnel for whom no role was reported. Examples include cafeteria workers and bus drivers.
(Source: PEIMS, 050, 090)

42. **AVERAGE CENTRAL ADMINISTRATIVE SALARY:** The total salary of central administrators divided by the total FTE count of central administrators. The total salary amount includes base pay only; any supplements are excluded.
(Source: PEIMS, 060)

43. **AVERAGE CAMPUS ADMINISTRATIVE SALARY:** The total salary of campus administrators divided by the total FTE count of campus administrators. The total salary amount includes base pay only; any supplements are excluded.
(Source: PEIMS, 060)

44. **AVERAGE PROFESSIONAL SUPPORT SALARY:** The total salary of professional support staff divided by the total FTE count of professional support staff. The total salary amount includes base pay only; any supplements are excluded.
(Source: PEIMS, 060)

45. **AVERAGE TEACHER SALARY:** The total salary of teachers divided by the total FTE count of teachers. The total salary amount is base pay only, and does not include career ladder or any other supplements.
(Source: PEIMS, 060)

46. **% MINORITY STAFF:** The FTE count of all personnel reported as non-white expressed as a percent of total staff FTEs.
(Source: PEIMS, 040)

47. **RATIO OF STUDENTS TO TOTAL STAFF:** The total number of students enrolled divided by the total staff FTE count.
(Source: PEIMS, 050, 110)

48. **RATIO OF STUDENTS TO TEACHERS:** The total number of students enrolled divided by the total teacher FTE count.
(Source: PEIMS, 090, 110)

49. **AVERAGE TEACHER APPRAISAL SCORE:** The total of all appraisal scores divided by the number of teachers appraised. Appraisal scores are based on a statewide teacher appraisal system which provides a process and criteria with which to evaluate the performance of teachers for career ladder level assignment purposes. "LT5" will appear in cases where fewer than five teachers were appraised to protect the teachers' anonymity. If no teachers were appraised an "n/a" is printed.

0.1	-	79.9	Unsatisfactory
80.0	-	103.9	Below Expectations
104.0	-	135.9	Meets Expectations
136.0	-	159.9	Exceeds Expectations
160.0	-	184.0	Clearly Outstanding

(Source: PEIMS, 050)

50. **% TEACHERS WITH 1 OR MORE PERMITS:** The FTE count of teachers holding at least one permit as of fall 1990, expressed as a percent of the total teacher FTE count. Teachers with multiple permits are counted only once.

The TEA issues four types of permits that meet different situations and require different qualifications: emergency teaching, nonrenewable, special assignment, and vocational. Superintendents may activate temporary classroom assignment permits without TEA approval. Teachers holding one or more of *any* of these types of permits are included in the count.
(Source: PEIMS, 080)

51. **% WITH 5 OR FEWER YEARS OF EXPERIENCE:** The FTE count of teachers with zero through five total years of teaching experience expressed as a percent of the total teacher FTE count. Total years of teaching experience includes experience earned in another Texas school district or in another state.
(Source: PEIMS, 040)

52. **AVERAGE YEARS OF EXPERIENCE:** A weighted average obtained by multiplying each teacher's FTE count by his or her years of experience, summing for all weighted counts, and then dividing by total teacher FTEs. Adjustments have been made so that teachers with zero years of experience are appropriately weighted in the formula.
(Source: PEIMS, 040)

53. **% WITH ADVANCED DEGREES:** The FTE count of teachers with master's or doctorate degrees expressed as a percent of total teachers.
(Source: PEIMS, 040)

54. **% ON CAREER LADDER LEVEL 2:** The fall of 1991 FTE count of teachers reported as placed on level two, expressed as a percent of total teacher FTEs. Many districts do not make career ladder placement decisions until the end of the school year; therefore counts may be under-reported.
(Source: PEIMS, 050)

55. **% ON CAREER LADDER LEVEL 3:** The fall 1991 FTE count of teachers reported as placed on level three, expressed as a percent of total teacher FTEs. Many districts do not make career ladder placement decisions until the end of the school year; therefore counts may be under-reported.
(Source: PEIMS, 050)

56. **% WHITE:** The FTE count of teachers reported as white expressed as a percent of total teacher FTEs.
(Source: PEIMS, 040)

57. **% AFRICAN AMERICAN:** The FTE count of teachers reported as African American expressed as a percent of total teacher FTEs.
(Source: PEIMS, 040)

58. **% HISPANIC:** The FTE count of teachers reported as Hispanic expressed as a percent of total teacher FTEs.
(Source: PEIMS, 040)

59. **% OTHER:** The FTE count of teachers reported as Asian / Pacific Islander or native American expressed as a percent of total teacher FTEs.
(Source: PEIMS, 040)

60. **% REGULAR EDUCATION:** The FTE count of teachers identified as serving students receiving regular education instruction, expressed as a percent of total teacher FTEs.
(Source: PEIMS, 090)

61. **% SPECIAL EDUCATION:** The FTE count of teachers identified as serving students receiving special education instruction, expressed as a percent of total teacher FTEs.
(Source: PEIMS, 090)

62. **% COMPENSATORY EDUCATION:** The FTE count of teachers identified as serving students receiving compensatory education instruction, expressed as a percent of total teacher FTEs.
(Source: PEIMS, 090)

63. **% BILINGUAL/ESL EDUCATION:** The FTE count of teachers identified as serving students receiving bilingual education or English as a Second Language (ESL) instruction, expressed as a percent of total teacher FTEs.
(Source: PEIMS, 090)

64. **% VOCATIONAL EDUCATION:** The FTE count of teachers identified as serving students receiving vocational education instruction, expressed as a percent of total teacher FTEs.
(Source: PEIMS, 090)

65. **% OTHER EDUCATION (INCLUDES GIFTED AND TALENTED):** The FTE count of teachers identified as serving students receiving gifted and talented education instruction, students in honors classes and students served in migrant programs, expressed as a percent of total teacher FTEs. On average, almost 98 percent of this category consists of teachers serving gifted and talented or honor students.
(Source: PEIMS, 090)

66. **TAXABLE VALUE PER PUPIL:** The district's total taxable property value in 1991 as determined by the Comptroller's Property Tax Division (CPTD), divided by the total enrollment of the district in 1991-92. This property value is determined by the CPTD as part of its annual study which attempts to present uniformly appraised property valuations statewide. The CPTD value is calculated by applying ratios created from uniform independent appraisals to the district's assessed valuations.
(Sources: CPTD, Study; PEIMS, 110)

67. **EQUALIZED TOTAL TAX RATE:** The sum of the district maintenance and operation and debt service effective tax rates plus the county education district (CED) effective rate. The components of this total rate are calculated by dividing the levies from the CPTB Self Report by the Comptroller's taxable value. (NOTE: The CPTD taxable value is not the same as the locally assessed value.)
(Sources: CPTB, Study; CPTB, Self Report)

68. **STATE AID AND LOCAL TAXES PER PUPIL (UNEQUALIZED):** The amount of state money allocated to the school district under the Foundation School Program plus both the levy amount generated by the locally adopted total tax rate of the district and the allotment distributed to the district from the County Education District. This amount divided by total enrollment results in the per pupil amount shown. This item indicates the total estimated amount of funds available to the district from state, CED, and local sources, both within and outside of the FSP system. Unequalized local funds are included in this amount. The state money component of this item is the same amount shown in item 70.

The amount of unequalized revenue is the difference between item 69 and item 68.
(Sources: Foundation Master; PEIMS, 110)

69. **TOTAL FSP REVENUE PER PUPIL (EQUALIZED):** The level of revenue which is recognized and supported by the equalized state system. This amount includes estimates of all state, CED, and local funds available to the district that are in Tier I and Tier II of the Foundation School Program. Local enrichment that is outside the FSP (unequalized local enrichment) is not included in this amount. This amount divided by total enrollment results in the per pupil amount shown.
(Sources: Foundation Master; PEIMS, 110)

70. **STATE AID PER PUPIL:** The estimated amount of state money allocated to the school district under the Foundation School Program divided by each district's total enrollment. This amount is a component of item 68.
(Sources: Foundation Master; PEIMS, 110)

71. **TOTAL REVENUE:** Budgeted revenue from all local, state, and federal sources, except for receipts from the sale of bonds and other revenues budgeted in fund 60, the capital projects fund. See *Exhibit D* in the *End Notes* for a technical description of this item. *Bulletin 679, Financial Accounting Manual*, sets standards for the accounting of revenues.
(Source: PEIMS, 030).

72. **TOTAL REVENUE PER PUPIL:** Total revenue divided by total enrollment.
(Source: PEIMS, 030, 110)

73. **% STATE:** Revenue from state sources, such as per capita and foundation program payments, revenue from other state funded programs such as Adult Basic Education, and revenue from other state agencies, expressed as a percent of total revenue. See *Exhibit D* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030)

74. **% LOCAL AND OTHER:** Revenue from local taxes, other local sources, and intermediate sources expressed as a percent of total revenue. See *Exhibit D* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030)

75. **% FEDERAL:** Revenue received directly from the federal government or distributed by the TEA for vocational education, programs for educationally disadvantaged children, food service programs, and other federal programs, expressed as a percent of total revenue. See *Exhibit D* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030)

76. **TOTAL EXPENDITURES:** Budgeted outlays of money for all functions and objects, except for expenditures budgeted in fund 60, the capital projects fund. *Bulletin 679, Financial Accounting Manual* sets standards for the accounting of expenditures.

Expenditures are accounted for using codes for fund, function, object, organization; and, in some cases, program area. See *Exhibit D* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030)

77. **% INSTRUCTIONAL:** The percentage of total expenditures budgeted for instructional expenditures in the district. Instructional expenditures include expenditures for all activities dealing directly with the instruction of pupils, including instruction aided with computers. See *Exhibit D* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030)

78. **% CENTRAL ADMINISTRATIVE:** The percentage of total expenditures budgeted for central administration expenditures in the district. Central administrative expenditures include expenditures for the general administration of the district, the development of personnel and curriculum, and data processing services. See *Exhibit D* in the *End Notes* for a technical description of this item,
(Source: PEIMS, 030)

79. **% CAMPUS ADMINISTRATIVE:** The percentage of total expenditures budgeted for campus administration expenditures in the district. Campus administration expenditures include expenditures for the operation and management of a school. See *Exhibit D* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030)

80. **% PLANT SERVICES:** The percentage of total expenditures budgeted for physical plant maintenance and operation. See *Exhibit D* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030)

81. **% OTHER OPERATING:** The percentage of total expenditures budgeted for all other operating expenditures in the district. Other operating expenditures include expenditures for support services, pupil transportation, food services, and co-curricular activities. See *Exhibit D* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030)

82. **NON-OPERATING:** The percentage of total expenditures budgeted for non-operating expenditures in the district. Non-operating expenditures include capital outlay expenditures not made from fund 60, the capital projects fund; debt service expenditures; and, ancillary services expenditures. See *Exhibit D* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030)

83. **TOTAL OPERATING EXPENDITURES:** The sum of all expenditures budgeted for the operation of the district. The operating expenditures are a subset of the total expenditures; they do not include debt service, capital outlay, or ancillary services. See *Exhibit D* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030)

84. **TOTAL OPERATING EXPENDITURES PER PUPIL:** Total operating expenditures divided by total enrollment.
(Sources: PEIMS, 030, 110)

85. **TOTAL INSTRUCTIONAL EXPENDITURES:** The sum of budgeted expenditures for all activities dealing directly with the instruction of pupils, including instruction through the use of computers. This is the amount used in the percent calculation for item 77.
(Source: PEIMS, 030)

86. **TOTAL INSTRUCTIONAL EXPENDITURES PER PUPIL:** Budgeted instructional expenditures divided by total enrollment.
(Sources: PEIMS, 030, 110)

87. **% REGULAR EDUCATION:** Expenditures budgeted for the regular education program expressed as a percent of total instructional expenditures. See *Exhibit D* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030)

88. **% SPECIAL EDUCATION:** Expenditures budgeted for the special education program expressed as a percent of total instructional expenditures. See *Exhibit D* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030)

89. **% COMPENSATORY EDUCATION:** Expenditures budgeted for the compensatory education program expressed as a percent of total instructional expenditures. See *Exhibit D* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030)

90. **% BILINGUAL/ESL EDUCATION:** Expenditures budgeted for the bilingual education and English as a Second Language programs expressed as a percent of total instructional expenditures. See *Exhibit D* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030)

91. **% VOCATIONAL EDUCATION:** Expenditures budgeted for the vocational education program expressed as a percent of total instructional expenditures. See *Exhibit D* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030)

92. **% GIFTED AND TALENTED EDUCATION:** Expenditures budgeted for the gifted and talented education program expressed as a percent of total instructional expenditures. See *Exhibit D* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030)

Appendix

DATA SOURCES

Data sources are arranged in alphabetical order by the abbreviations used in the *Item Definitions* section.

CPTD, SELF REPORT: The *Comptroller's Property Tax Division 1991 Self Report*. This report contains local tax roll assessed values for property, levy amounts, and tax rate information for all school districts with taxable property. *Item 67. Exhibit 21.*

CPTD, STUDY: The *Comptroller's Property Tax Division1991 Property Value Study*, May 31, 1992. This study provides local tax roll property values as of January 1, 1991 for each district by category of land use as well as the Comptroller's re-evaluated values. *Items 66, 67. Exhibit 21.*

DIVISION OF ACCREDITATION: A Texas Education Agency division that is responsible for accrediting school districts. This division maintains information regarding the current accreditation status of all districts in the state. The information is updated frequently to reflect the results of site visits by accreditation teams. Accreditation status in this publication was current as of June1992. *Item 2.*

FALL SURVEY OF PUPILS: *The Fall Survey of Pupils in Membership* taken in October 1986. This report provided a one day head count of the total number of students enrolled on the first Monday of October each school year. Counts of students were collected by campus, by grade, by ethnicity, by gender, and by population type (either regular or special education). This report was discontinued after the 1989-90 school year. Counts of students began to be collected through PEIMS thereafter. *Item 5.*

FOUNDATION MASTER: A TEA data file that contains detailed information about state funding amounts and calculations for each entity receiving state monies under the Foundation School Program. *Items 68-70.*

ORGANIZATION MASTER FILES: TEA data files containing basic organizational attributes about schools and school districts, including name and identification number, county name and number, Education Service Center region, State Board of Education district, type of district (regular FSP, special statutory, or state-administered), and mailing address. *Item 3; Exhibits 1-4.*

PEIMS: All information in this document from the *Public Education Information Management System* was reported in the fall 1991 submission. Districts were asked to report data as of October 25, 1991. Districts reported budgeted financial data for the entire 1991-92 school year. For more information about the PEIMS reporting requirements see the ***1991-92 Public Education Information Management System Data Standards***. PEIMS data sources have been subdivided by type of information reported.

030: **Budget Amounts.** Amounts budgeted by the district, or campus if appropriate, reported by fund, function, object, and in some cases by program. *Items 71-92; Exhibits 20, 23-25.*

040: **Staff Demographics.** Information about each employee's gender, ethnicity, years of experience, and post-secondary degree. *Items 46, 51-53, 56-59; Exhibit 17.*

050: **Employment Characteristics.** Information for each employee such as tenure, full-time equivalency status, and career ladder information. *Items 34-41, 47, 49, 54, 55; Exhibit 19.*

060: **Payroll.** The payroll amounts paid to each employee. Both base pay and any supplement amounts are reported by fund, function, object, and program. *Items 42-45; Exhibit 18.*

080: **Permit.** The type of permit, issue date, renewal date, role of the individual permitted, and permit subject area. *Item 50.*

090: **Responsibilities.** The duties performed by each professional employee. Districts report each class schedule for the employees who are teachers. *Items 35-41, 48, 60-65; Exhibits 15, 16.*

110: **Student Enrollment.** Enrollment information about each student, including the student's grade, economically disadvantaged status, and indicators of the special programs in which the student participates. *Items 4-15, 47, 48, 66, 68-70, 72, 84, 86; Exhibits 5-8.*

201: **Basic Dropout Data.** Last known information about a dropout; last campus of enrollment, grade level, special education indicator, economically disadvantaged indicator, and exit reason. Also this record contains demographics about the dropout such as gender, ethnicity, and age. *Item 15; Exhibits 8-10.*

202: **Basic Graduate Data.** Information about each graduate, including the date of graduation, college plans, and whether or not the graduate earned an advanced seal on his or her transcript. *Items 17, 18.*

PSR, TABLE I: The *Principal's Semester Report of Student Attendance and Contact Hours, Table I.* This report provides attendance and contact hour information by six-week period and grade level for each campus. Three six-week periods are reported in the fall and three are reported in the spring. *Item 16.*

SAT/ACT FILE: With permission from public school districts, a file created by the TEA from Scholastic Aptitude Test (SAT) scores released by the College Board's Admissions Testing Program and ACT scores released by the American College Testing Program for Texas graduating seniors. Both testing programs typically release summary test score statistics to the TEA, the media, and the public each September for Texas seniors who graduated during the previous school year. However, the more detailed data linking students' scores to campuses and districts (which are used to create the TEA file) typically become available in the following spring. Thus, with the publication schedule, the test scores in this document are for 1990-91 graduating seniors. *Items 30-33. Exhibits 13, 14.*

SPECIAL ED. CO-OPS.: An annual TEA data file maintained by the Division of Special Education which indicates for each district whether or not the district is a member or fiscal agent of a special education cooperative, the type of district, how many members are in the cooperative, and if applicable, the cooperative name. *No item number; indicator that follows district name.*

TAAS: The Texas Assessment of Academic Skills test results for grades 3, 5, 7, 9, and 11 from the October 1991 test administration. TAAS test files contain percent passing by grade and subject and can be further analyzed by several characteristics of the students tested. *Items 19-29; Exhibits 11, 12.*

TEXAS LEGISLATIVE COUNCIL MAPS: The Legislative Council maintains maps illustrating the State Board of Education districts which are defined by statute. The legal descriptions of the districts are available in *Texas Education Code* §11.21, Composition of the Board. The SBOE districts printed in this publication are those that were in effect during the 1991-92 school year.

END NOTES

ACADEMIC EXCELLENCE INDICATOR SYSTEM (AEIS): A set of indicators mandated by statute to emphasize student achievement for purposes of accountability as well as recognition. *Exhibit A* lists the 1991-92 indicators and notes the corresponding ***Snapshot*** item numbers for the indicators included in this document.

ASSESSED VALUATION: This is the locally assessed value of property that a district actually taxes. Property values are assessed by county appraisal districts, not the school districts. Assessment practices can vary from district to district; that is, two properties of equal worth may not be appraised at the same value in two different districts. District practices in exempting property from taxation also vary. TEA receives information about locally assessed valuation from the Property Tax Division of the Comptroller's Office of Public Accounts.

AVAILABLE SCHOOL FUND: The Available School Fund (ASF) was constitutionally created in 1876. It consists primarily of earnings from the Permanent School Fund and taxes dedicated to the fund by the state constitution. Most of the ASF revenue is distributed to local school districts on a per capita basis which is set by the State Board of Education using annual earnings estimates for the fund. The per capita apportionment to school districts in 1991-92 was $344 per ADA. The ASF also pays for school textbooks.

EXHIBIT A
1991-92
Academic Excellence Indicators

Indicator	Corresponding Snapshot Item

5. Graduation Rate	#15
6. % Graduates with Advanced Seals on Transcript	#18
7. College Admissions Tests	
% Taking Tests	#30
% Above Criterion	#31
SAT Mean Total Score	#32
ACT Mean Composite Score	#33

AVERAGE DAILY ATTENDANCE (ADA): Student attendance information is reported for the three six-week periods in the fall and the three six-week periods in the spring on the *Principal's Semester Report of Student Attendance and Contact Hours, Table I.* For each district, full-year ADA is calculated as the sum of the number of students in attendance for the 6 six-week periods divided by 180 days. Beginning in 1991-92, ADA includes students in the pre-kindergarten classes.

BUDGET-BALANCED: Until the 1991-92 school year,districts were identified as budget-balanced if the sum of the Available School Fund payment plus the Local Fund Assignment was greater than the Foundation School Program allocation as determined by state formulas. County Education Districts (CEDs) were created with the passage of SB 351 in 1991 to equalize the wide range of property tax bases, and, as a result, no CED is budget-balanced. There are however, a handful of districts who receive an adequate amount of revenue from the CED and the Available School Fund to meet the FSP budget without additional state aid. These districts can be considered budget-balanced.

CAMPUS TYPE: Campuses are divided into types according to the range of grades offered as reported to the TEA. The grid in *Exhibit B* shows the possible combinations of low and high grades for each of the campus types. For example, a campus offering a low grade of 5, found along the left edge of the grid, and a high grade of 6, found along the top edge of the grid, is classified as a middle school. A campus offering only grade 9 (both the low and high grade) is a high school.

COUNTY EDUCATION DISTRICT (CED): Senate Bill 351 established a second taxing entity to replace the local district in generating revenue for the portion of the Foundation School Program allocation known as the Local Fund Assignment (LFA). County Education Districts were created to equalize the wide range of district property tax bases for school finance purposes. The 188 CEDs, which are made up of one or more counties, generate and distribute revenue to each school district within the CED. Statute required a minimum LFA tax rate of $0.72 per $100 valuation for each CED during the 1991-92 school year.

% Above Criterion: College Admissions Tests *(added)*	—	31

ETHNICITY: Counts of students and staff are collected by major ethnic group. Counts of student enrollments and staff by ethnic group are derived from the fall 1991 PEIMS collection. These major ethnic groups are white, Hispanic, African American, Asian/Pacific Islander, and native American. In this publication "other" is presented as the sum of Asian/Pacific Islander and native American.

EXPENDITURE FUNCTIONS: An expenditure function designates the purposes for which expenditures are made. Function codes used by school districts are outlined in section CDE-403 of *Bulletin 679, Financial Accounting Manual.* Functions for which money can be spent are:

11	Instruction and Instructional Computing;
21	Instructional Administration and Research & Development;
22	Instructional Resources & Media Services;
23	School Administration;
25	Curriculum & Instructional Staff Development;
26	Communication and Dissemination;
31	Guidance and Counseling Services;
32	Social Work Services;
33	Health Services;
34	Pupil Transportation;
36	Co-curricular/Extracurricular Activities;
37	Food Services;
41	General Administration;
42	Debt Services;
51	Plant Maintenance and Operation;
52	Facilities Acquisition & Construction;
75	Data Processing Services; and
81	Community Services.

Exhibit D lists the function codes included in the revenue and expenditure items found in the *District Detail* section.

* Does not include 5990

EXPENDITURE OBJECTS: An expenditure object identifies what was purchased. Object codes are outlined in section CDE-409 of *Bulletin 679, Financial Accounting Manual.* Objects for which money can be spent are:

- 6100-Payroll Costs;
- 6200-Purchased & Contracted Services;
- 6300-Supplies & Materials;
- 6400-Other Operating Expenditures;
- 6500-Debt Service; and
- 6600-Capital Outlay.

Exhibit D lists the object codes included in the revenue and expenditure items found in the *District Detail* section.

FULL-TIME EQUIVALENTS: All staff counts are shown in terms of full-time equivalents (FTEs), a measure of the extent to which a person occupies a full-time position. For example, a teacher working a full day for the entire school year represents one FTE, a full-time teacher working one semester represents 1/2 FTE, and a teacher carrying a half load for the full year represents 1/2 FTE.

FTE apportionments apply to both part-time and full-time staff performing multiple duties. In cases where a person performs multiple tasks, portions of that person's FTE are assigned according to the time spent at each duty. For example, a full-time person employed half the time as a teacher and half as an administrator would be counted as a 0.5 administrator FTE and a 0.5 teacher FTE.

GUARANTEED YIELD: In 1991-92, this component of the Foundation School Program guaranteed districts $21.50 per student, per penny of tax effort levied by the school district. The school district tax effort is that tax rate adopted by the

055	Registrar
056	Athletic Trainer
057	Non-Campus Professional Support
058	Campus Professional Support

The FTEs of Adult Basic Education staff or staff employed by special education cooperatives are not included in the information presented in this document. Adult Basic Education staff are identified as having either Adult Basic Education service codes or as being paid from fund code 31 or 80, meaning Adult Basic Education Fund and Trust and Agency Funds, respectively. Staff are identified as participants in a cooperative if their assigned campus number belongs in a district different from their employing district, or if they are reported with a campus number of 701. Only the portion of a person's total FTE amount associated with the campus in another district (or with the 701 record) was counted as cooperative.

district, not including the $0.72 required for the County Education District. If a penny of local school district tax only generates half of the $21.50, the state provides the other half. Regardless of the portion of the $21.50 the local district is able to raise through a penny of tax effort, the state will contribute the rest, up to a total of $21.50. Districts able to generate $21.50 per student, per penny of effort on their own receive no state guaranteed yield funds. The guaranteed yield is also referred to as the second tier of the Foundation School Program.

LOCAL FUND ASSIGNMENT: Until the 1991-92 school year, this was the portion of the Foundation School Program allocation, as determined by state formulas, that was assigned to the district to raise. Senate Bill 351 now requires County Education Districts to raise this portion. While the state requires a $0.72 tax rate for CEDs, the dollar amount raised, or the county local fund assignment, varies with the CED's property wealth.

PEIMS: The *Public Education Information Management System* is the primary means through which the Texas Education Agency collects information on the staff, students and finances for all schools and school districts in the state.

STAFF CATEGORIES DEFINED BY ROLE ID: Staff information from the fall 1991 PEIMS responsibility records was aggregated into categories using the reported role identifiers. *Exhibit E* lists this detail.

STATE BOARD OF EDUCATION - MAP OF DISTRICT BOUNDARIES: The map in *Exhibit F* illustrates the 15 SBOE district boundaries. SBOE boundaries shown here reflect the 15 districts as they existed in 1991-92 not the districts formed as a result of redistricting based on the 1990 census. Members of the SBOE identified on page iii of this document are the members elected in November 1992 who assumed office in January 1993.

TUITION TRANSFERS: Expenditures budgeted by districts for the cost of sending students to other districts for instruction. Because the transferring district does not count the enrollment of transferred students, including the expenditure would distort per pupil amounts. Therefore, in this publication amounts budgeted for tuition transfers have been excluded. Tuition transfers are defined as the total of objects 6231-Tuition Services, 6232-Transportation Services, and 6239-Other Services. However, if there are no expenditures for 6231, then 6232 and 6239 are not excluded.

COMPLIANCE STATEMENT

TITLE VI, CIVIL RIGHTS ACT OF 1964; THE MODIFIED COURT ORDER, CIVIL ACTION 5281, FEDERAL DISTRICT COURT, EASTERN DISTRICT OF TEXAS, TYLER DIVISION

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act 1964 and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

(1) acceptance policies on student transfers from other school districts;
(2) operation of school bus routes or runs on a non-segregated basis;
(3) nondiscrimination in extracurricular activities and the use of school facilities;
(4) nondiscriminatory practices in the hiring, assigning, promoting paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;
(5) enrollment and assignment of students without discrimination on the basis or race, color, or national origin;
(6) nondiscriminatory practices relating to the use of a student's first language; and
(7) evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

Where a violation of Title VI of the Civil Rights Act is found, the findings are reported to the Office for Civil Rights, U.S. Department of Education.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

TITLE VII, CIVIL RIGHTS ACT OF 1964; EXECUTIVE ORDERS 11246 AND 11375; TITLE IX, 1973 EDUCATION AMENDMENTS; REHABILITATION ACT OF 1973 AS AMENDED; 1974 AMENDMENTS TO THE WAGE-HOUR LAW EXPANDING THE AGE DISCRIMINATION IN EMPLOYMENT ACT OF 1967; AND VIETNAM ERA VETERANS READJUSTMENT ASSISTANCE ACT OF 1972 AS AMENDED IN 1974.

It is the policy of the Texas Education Agency to comply fully with the nondiscrimination provisions of all federal and state laws and regulations by assuring that no person shall be excluded from consideration for recruitment, selection, appointment, training, promotion, retention, or anY other personnel action, or be denied any benefits for participation in any programs or activities which it operates on the grounds of race, religion, color, national origin, sex, handicap, age, or veteran status (except where age, sex, or handicap constitute a bona fide occupational qualification necessary to proper and efficient administration). The Texas Education Agency makes positive efforts to employ and advance in employment all protected groups.
